NDDOT Project Development Conference 2012
Best Western Ramkota Hotel, Bismarck, ND

Wednesday November 28, 1:30 to 4:30 p.m.

Stormwater Management Training

Matt Sperry, Environmental and Transportation Services

Regulatory action regarding storm water management practices has increased and NDDOT is subject to regulatory review. The training provided in this session will enhance the participant's knowledge of stormwater management practices by providing guidance on erosion and sediment controls, Stormwater Pollution Prevention Plan (SWPPPs), Municipal Separate Storm Sewer System (MS4s) plans and their implementation, preliminary plan development and construction activities.

The training will highlight:

- New Specifications
- Recap field visits from 2012
- Identify Stormwater Pollution Prevention Plan Procedures
- Identify how to make field changes
- Include roundtable discussion
- Identify MS4 practices in an urban setting
