**Website:** [www.aidac.com](http://www.aidac.com)

## Description of Services:

- Consultant: Other (Actuarial, Data Aggregation and Analysis)

Actuarial-Insurance Data Analyst Consulting LLC has become a newly certified North Dakota DBE.

The firm's principal has an undergraduate and graduate education in the field of Mathematics and Actuarial Science. Moise has been practicing actuarial and data analysis work since 1999. He came to the realization that he can make a greater difference by providing services directly to companies rather than being an insurance carrier's employee. As a direct provider AIDAC immediately establishes the client relationship and gains understanding of the client's desires.

AIDAC provides data analysis to clients to make definitive actions on business strategies and future plans. Additionally, as a consultant, AIDAC works one on one with the client to monitor how their service is helping them. When asked his greatest obstacle in business, Moise stated, "The lack of a significant number of clientele since the firm is still relatively new in its operations, but we overcome this by increasing publication of our expertise and ability to provide high level actuarial and data analysis services to the public and private sectors."

AIDAC is currently performing a quality assurance audit of an administration system called FAST. In this project AIDAC has the opportunity to use actuarial science to replicate results produced by the FAST system. AIDAC created an excel calculator to calculate Death Benefit, Reserves, Annuitization values, Account Value and other variables. The purpose of this exercise is to verify that the system is producing the expected results.

AIDAC is currently completing a key engagement providing expert-level actuarial services for a \$29.5 billion business that specializes in technology and processing solutions in the insurance and financial services industries.

## Achievements:

Designed an Excel / VBA tool used to calculate quotes on any contract, positioned to serve as a validation tool against quotes provided by LifeCard and FAST on single premium deferred annuity.

Developed a replication Excel file capable of calculating reserve to compare against reserve numbers in the LifeCad and FAST system on single premium deferred annuity.

# New DBE Announcement

**Business:** Raimonde Drilling Corporation  
**Owner:** Anne T. Leslie  
**Location:** 770 Factory Road, 1st Floor  
Addison, IL 60101-4300  
**Phone:** (630) 458-0590  
**Fax:** (630) 458-0914  
**Email:** [rdcdrill@rdc-drill.com](mailto:rdcdrill@rdc-drill.com)  
**Website:** [www.raimonde-drilling.com](http://www.raimonde-drilling.com)

## Description of Services:

- CONCRETE FLAT WORK: Other coring; UNDERGROUND WORK: Underground Boring

Raimonde Drilling Corporation (RDC) was established in 1971 by Frank Raimonde. Anne Leslie, his daughter shared his passion for the family business and has been employed at RDC since 1989. Upon Frank's retirement, Anne Leslie became president and owner of Raimonde Drilling Corporation and has become a newly certified North Dakota DBE.

Drilling and sampling services include vertical and angle drilling into soil and bedrock formations. These services are for a wide variety of purposes from mineral exploration, environmental investigations, geotechnical engineering, to offshore drilling. Their vast amount of experience combined with the versatility of their equipment allow RDC to engage in projects across the country. Furthermore, utilization of drilled holes by installation of instrumentation or monitoring wells allows maximum use of project funding.

RDC has Mine Safety and Health Administration (MSHA) safety trained personnel and equipment that meets underground criteria required. This enables RDC to drill at mine locations across the country. Various diameter core samples are taken to depths of 1500 linear feet.

RDC drills and samples for environmental purposes for phase II projects and groundwater monitoring systems. Decontamination is performed and crews are HAZWOPER trained.

Geotechnical drilling requires various drilling methods from hollow stem augering to core drilling. Once drilling and sampling is performed RDC has been required to install instrumentation for monitoring subsurface for geophysics, stability, permeability and ground water.

Due to the fact that RDC is a small business and maintains versatility with skill and equipment, efficiency is key. RDC mobilizes quickly to perform services that clients demand. Their safety record illustrates that efficiency does not compromise safety. They have been awarded the Rock Solid Safety Award by MSHA at the Illinois Association of Aggregate Producers (IAAP) on March 3rd for 2015. This will be their 10th year winning this award.

## Construction Web Resources

NDDOT provides many resources for contractors and others seeking work on highway construction jobs.

Web links in below direct users to resources to help them plan for the future, let others know they're ready, able and willing to perform or provide their services, and stay aware of new and useful tools for locating work.
