## **REQUEST FOR PROPOSALS**

The Bismarck-Mandan Metropolitan Planning Organization (MPO) is requesting the services of a consulting firm to complete an update to the Morton County Future Land Use Plan (Plan). The Plan will be in cooperation with the cities of Bismarck, Mandan, and Lincoln, Burleigh County and Morton County, as well as the North Dakota Department of Transportation (NDDOT), the Federal Highway Administration (FHWA), and the Federal Transit Administration (FTA).

### **MPO AREA BACKDROP**

The Bismarck-Mandan MPO planning area is comprised of five (5) jurisdictions including the Cities of Bismarck, Mandan, and Lincoln and portions of two (2) counties including Burleigh County and Morton County. The MPO planning area is centrally located within North Dakota, with the City of Bismarck being the capital city for the State. The cities of Bismarck and Mandan also serve as the County Seats for their respective counties.

The MPO planning area is roughly 394 square miles with a 2010 US Census Bureau identified population of approximately 100,000 or approximately 42,000 households. The MPO area is bisected from north to south by the Missouri River and is generally comprised of rolling topography throughout. One of the more noteworthy challenges facing the MPO planning area is the heightened level of growth, due largely to energy development in western North Dakota. Historic growth trends in the area have traditionally experienced a 1% to 1.5% annual rate of population growth. Based on the most recent projections developed by the Bismarck-Mandan MPO the area is expected to grow by 3.5% annually between 2010 and 2020 and then return to a 1% to 1.5% annual growth rate between 2020 and 2040. This is a significantly higher level of growth than has been projected in previous planning efforts.

Future land use planning is very closely tied to effective transportation planning, and specifically to a successful Long Range Transportation Plan. Key land use components (i.e. development density, topography, and location influence) can strongly impact essential transportation planning factors such as street access, design, traffic patterns, and traffic volumes. These factors determine future traffic modes. For example, a connected system of streets, with high-residential densities and mixed land use, can facilitate both traditional (automobile) and alternative modes (bike, pedestrian, transit) of transportation. More dispersed land development patterns typically reduce the viability of alternative modes and increase vehicular travel. Establishing future land uses will impact the transportation alternatives identified for future LRTP's and other MPO studies and initiatives.

### **PROJECT CONTEXT**

Morton County is in the process of completing a Morton County Comprehensive Plan Update. The Plan Update will set goals, objectives, and strategies for land use and development in the county to be implemented until the year 2045. A joint project between Morton County and the MPO will produce a Future Land Use Map for the portion of Morton County that lies within the MPO boundary. The final draft of the MPO's Morton County Future Land Use Plan will be integrated as part of the Morton County Comprehensive Plan Update document.

The Morton County Land Use code currently defines eight zoning districts (Agricultural, Residential, Residential Multifamily, Recreational, Commercial, Limited Commercial, Industrial and Limited Industrial). In order to adequately plan for orderly growth and development in Morton County –

specifically the portion of Morton County that lies within the MPO boundary and is more immediately subject to metropolitan development pressures – the County is best advised to amend its zoning code to refine and enact more nuanced zoning categories. Generally, future land use categories are broader than zoning categories. However, it is anticipated that the land use categories that are utilized within the Future Land Use Plan will closely (if not even precisely) parallel the zoning categories that will be enacted in the Morton County Land Use Code. Because these two developments (Morton County Zoning updates and the Future Land Use Plan) are so intertwined, it will be critical that a robust discussion about Morton County zoning categories be incorporated as part of the public outreach process in the development of the Future Land Use Plan. Morton County zoning category updates and the Future Land Use Plan together will provide a basis that will equip Morton County Planning & Zoning Commission and County Commission to make land use decisions that will assist in fulfilling long-range planning goals for both Morton County and the Bismarck/Mandan Metropolitan region as a whole.

## **OBJECTIVES**

- 1) To produce a future land use map that will guide decision making at the County and regional levels regarding future growth and development on the western fringe of the Bismarck/Mandan metropolitan area.
- 2) To refine zoning districts that currently exist in the Morton County Land Use Code such that the zoning districts will better lend themselves to orderly growth and development in Morton County.
- 3) To make public outreach, involvement, and education a centerpiece in the development of the Future Land Use Plan (and development of updated zoning districts, as applicable).
- 4) To provide information and insight that will be used for the upcoming update of the metropolitan travel demand forecasting model and Bismarck-Mandan Long Range Transportation Plan.

#### **SCOPE OF WORK**

The selected consultant for the updated Plan should review the existing Future Land Use Plan as well as all applicable MPO studies. They must also ensure consistency with all plans and studies conducted by the MPO's jurisdictional entities. *(See INFORMATION AVAILABLE FOR CONSULTANT)*

**Study Area:** The entire portion of the MPO area that intersects with Morton County, less the City of Mandan and its 1-Mile Extra Territorial Boundary (ETA).

**Appointment of a Project Steering Committee:** This group will be formed from the collaboration of input from Morton County, the MPO, and the selected consultant. This oversight committee should include members of the community who represent key stakeholder groups (economic development, agricultural interests, the public, homebuilders/developers, natural resource/water preservation, etc.)

**Land Use Suitability Analysis:** The consultant shall conduct an analysis of existing and projected future conditions including, but not limited to the following inputs and considerations: topography, flood zones, agricultural suitability; population, housing and employment projections; existing transportation and land use plans; existing local and regional policies; and new data sources as relevant and appropriate. Consultant shall develop a document explaining the core assumptions and inputs that contributed to the development of the Future Land Use Plan alternatives. The document need not be exhaustive.

#### **IDENTIFICATION OF STUDY AREA**

A detailed map showing the study area is attached to this request for proposal: Appendix A

## **REQUIREMENTS**

The consultant will present a draft plan to the MPO TAC and Policy Board. Additionally, the consultant will provide monthly updates regarding the status of the project to the Bismarck-Mandan MPO Technical Advisory Committee and Policy Board. A minimum of two (2) newsletter style updates will be provided to the Morton County Planning and Morton County Commissioners at appropriate times throughout the development of the document.

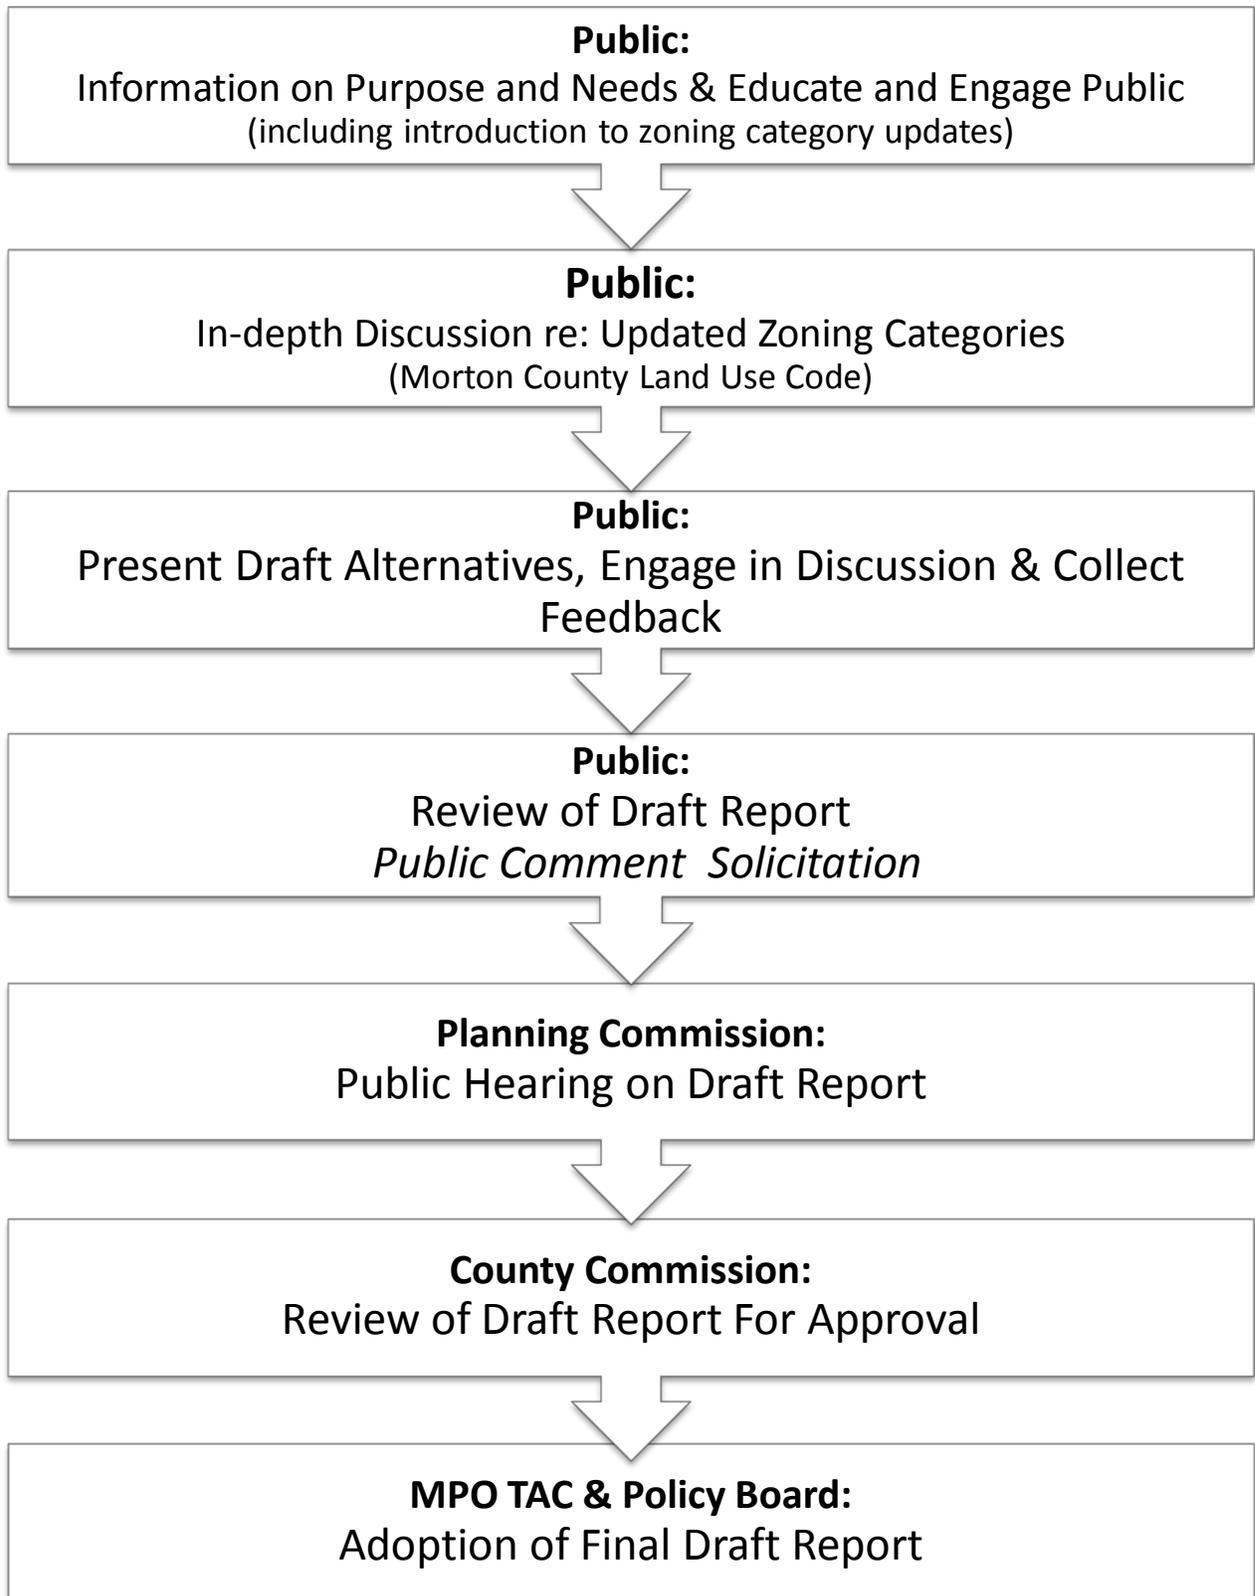

At a minimum, consultation is required with the appropriate state and local agencies responsible for land use management, natural resources, environmental protection, conservation; and historic preservation. A contact list of relevant stakeholders within the area will be provided.

The consultant will contact jurisdictional parks and recreation departments, fire departments, airports, school districts, and other appropriate or affected jurisdictional service providers for anticipated future plans. Further the consultant should make reasonable efforts to contact and gain involvement from major affected landowners, business and industry organizations and agricultural interests.

## **PUBLIC INVOLVEMENT PROCESS**

The consultant will provide the following public involvement meetings as outlined in Figure 1:

Figure 1: **Public Involvement Plan**

Public Participation will be consistent with the “Bismarck-Mandan Public Participation Plan” (adopted December 2010) and Title VI/Non-Discrimination Plan (adopted September 2014). Consultation with environmental resource agencies shall be completed during the study. The use of visual aids such as, but not limited to, pictures, maps, diagrams, charts, and/or other graphic displays, as well as, the use of electronic media, e-mail and/or the internet is strongly encouraged in the public participation process.

Obtaining public participation and meaningful public input in the development of studies/plans has historically been a challenge. Innovation and creativity is encouraged throughout the development of this Plan, especially in the public participation process. This is particularly appropriate in methods of attracting public audiences, obtaining meaningful public input, and minimizing costs. The consultant is encouraged to consider the use of on-line surveys, community access television, direct mailings, e-mail lists, polling systems, press releases, and social networking media if appropriate to enhance the public involvement process. The development and maintenance of a project web-site is required. The use of a focus group and/or steering committee should be utilized in the development of the document.

The location of public meetings will consider mobility challenged individuals including, but not limited to, individuals with disabilities and/or individuals without adequate access to automobiles. Unconventional meeting locations should be considered to attract members of the public.

All questions, comments, or concerns obtained through the public involvement process will be documented, as well as how the questions, comments, or concerns were addressed and/or incorporated into the document identified. Additionally the consultant shall document approval/acceptance dates of each of the aforementioned commissions, as well as, the Bismarck-Mandan MPO TAC and Policy Board.

Steve Saunders  
Principal Transportation Planner  
Bismarck/Mandan MPO  
221 North 5<sup>th</sup> Street  
P.O. Box 5503  
Bismarck, ND 58506-5503

The Bismarck/Mandan MPO will only consider proposals received prior to 4:00 P.M. CDT on November 13, 2015. Late proposals will be considered unresponsive and will not be considered. Each proposal will be evaluated by a 5 person selection committee of Bismarck-Mandan MPO staff (1), City of Mandan staff (1), NDDOT staff (1), Morton County staff, and an interested member of the public from Morton County (1).

Written proposals will be evaluated to determine the qualifications and ranking of firms. The Bismarck-Mandan MPO reserves the right to limit the interviews to a minimum of three (3) firms whose proposals most clearly meet the RFP requirements. Firms not selected to be interviewed will be notified in writing.

The selection process will be completed in accordance with Bismarck-Mandan MPO policies. Written proposals shall address the firm's ability to perform the necessary services in the allotted time with qualified personnel.

Selection will be on the basis of the following five (5) criteria:

- a. Past performance
- b. Ability of professional personnel
- c. Willingness to meet time and budget requirements
- d. Related experience on similar projects
- e. Project understanding, issues, and approach.

The proposal should list the personnel who will be assigned to work on the project, including titles, education, and work experience. The proposal pages shall be numbered and must be limited to 20 pages in length, including staff resumes, at a comfortably legible font. An appendix may be added to the proposal to furnish the QC/QA program and project schedule. (The QC/QA program and project schedule will not count toward the 20 page proposal.) Proposals that exceed the 20 page length requirement or add additional items to the appendix will not be considered.

The consultant's proposal shall include a schedule for the project. This schedule will be reviewed by the Bismarck-Mandan MPO and, if accepted, become the project schedule after the contract has been executed.

Proposals must identify all sub-consultants involved and furnish a completed Proposed Sub-Consultant Request (Appendix A). Approved copies of Prime Consultant Request to sublet must also be made available prior to execution of a contract. (Appendix B)

The consultant's proposal shall also include a Quality Control/Quality Assurance (QC/QA) program that will be used on this project. This QC/QA program shall identify the team members, their responsibilities, and stages of development at which each is to be responsible. The project schedule and QC/QA program may be included in the appendix and will not be considered as a part of the 20 page proposal.

Additional positive consideration of prospective proposals will be given if the proposal contains any prime or sub-consultant work done by a Disadvantaged Business Enterprise (DBE) company currently certified by the NDDOT. Proposals must clearly state whether or not an NDDOT certified DBE is participating on the consulting team, including the name and activity of that company.

A final scope of work will be developed and a price will be negotiated with the successful firm. An agreement will be executed with a single firm. If unable to arrive at a mutual agreement with the top ranked firm, the MPO retains the right to move on to negotiations with other firms which submitted proposals in rank order.

## **RIGHT OF REJECTION**

The Bismarck-Mandan MPO reserves the right to reject any or all proposals.

## **DISCLOSURE OF PROPOSAL**

At the conclusion of the selection process, the contents of all proposals will be subject to the City of Bismarck's Open Records Law and may be open to inspection by interested parties. Any information included in the proposal that the proposing party believes to be a trade secret or proprietary information must be clearly identified in the proposal. Any identified information recognized as such and protected by law may be exempt from disclosure.

The MPO reserves the right to hold 10% of the total contracted invoiced amounts until the MPO believes it has received all of the following to its satisfaction:

- Contracted deliverables as described in the RFP and final contract;
- Completed tasks as described in the RFP and final contract; and
- Satisfactory final product, project or plan as recognized by the MPO Policy Board.

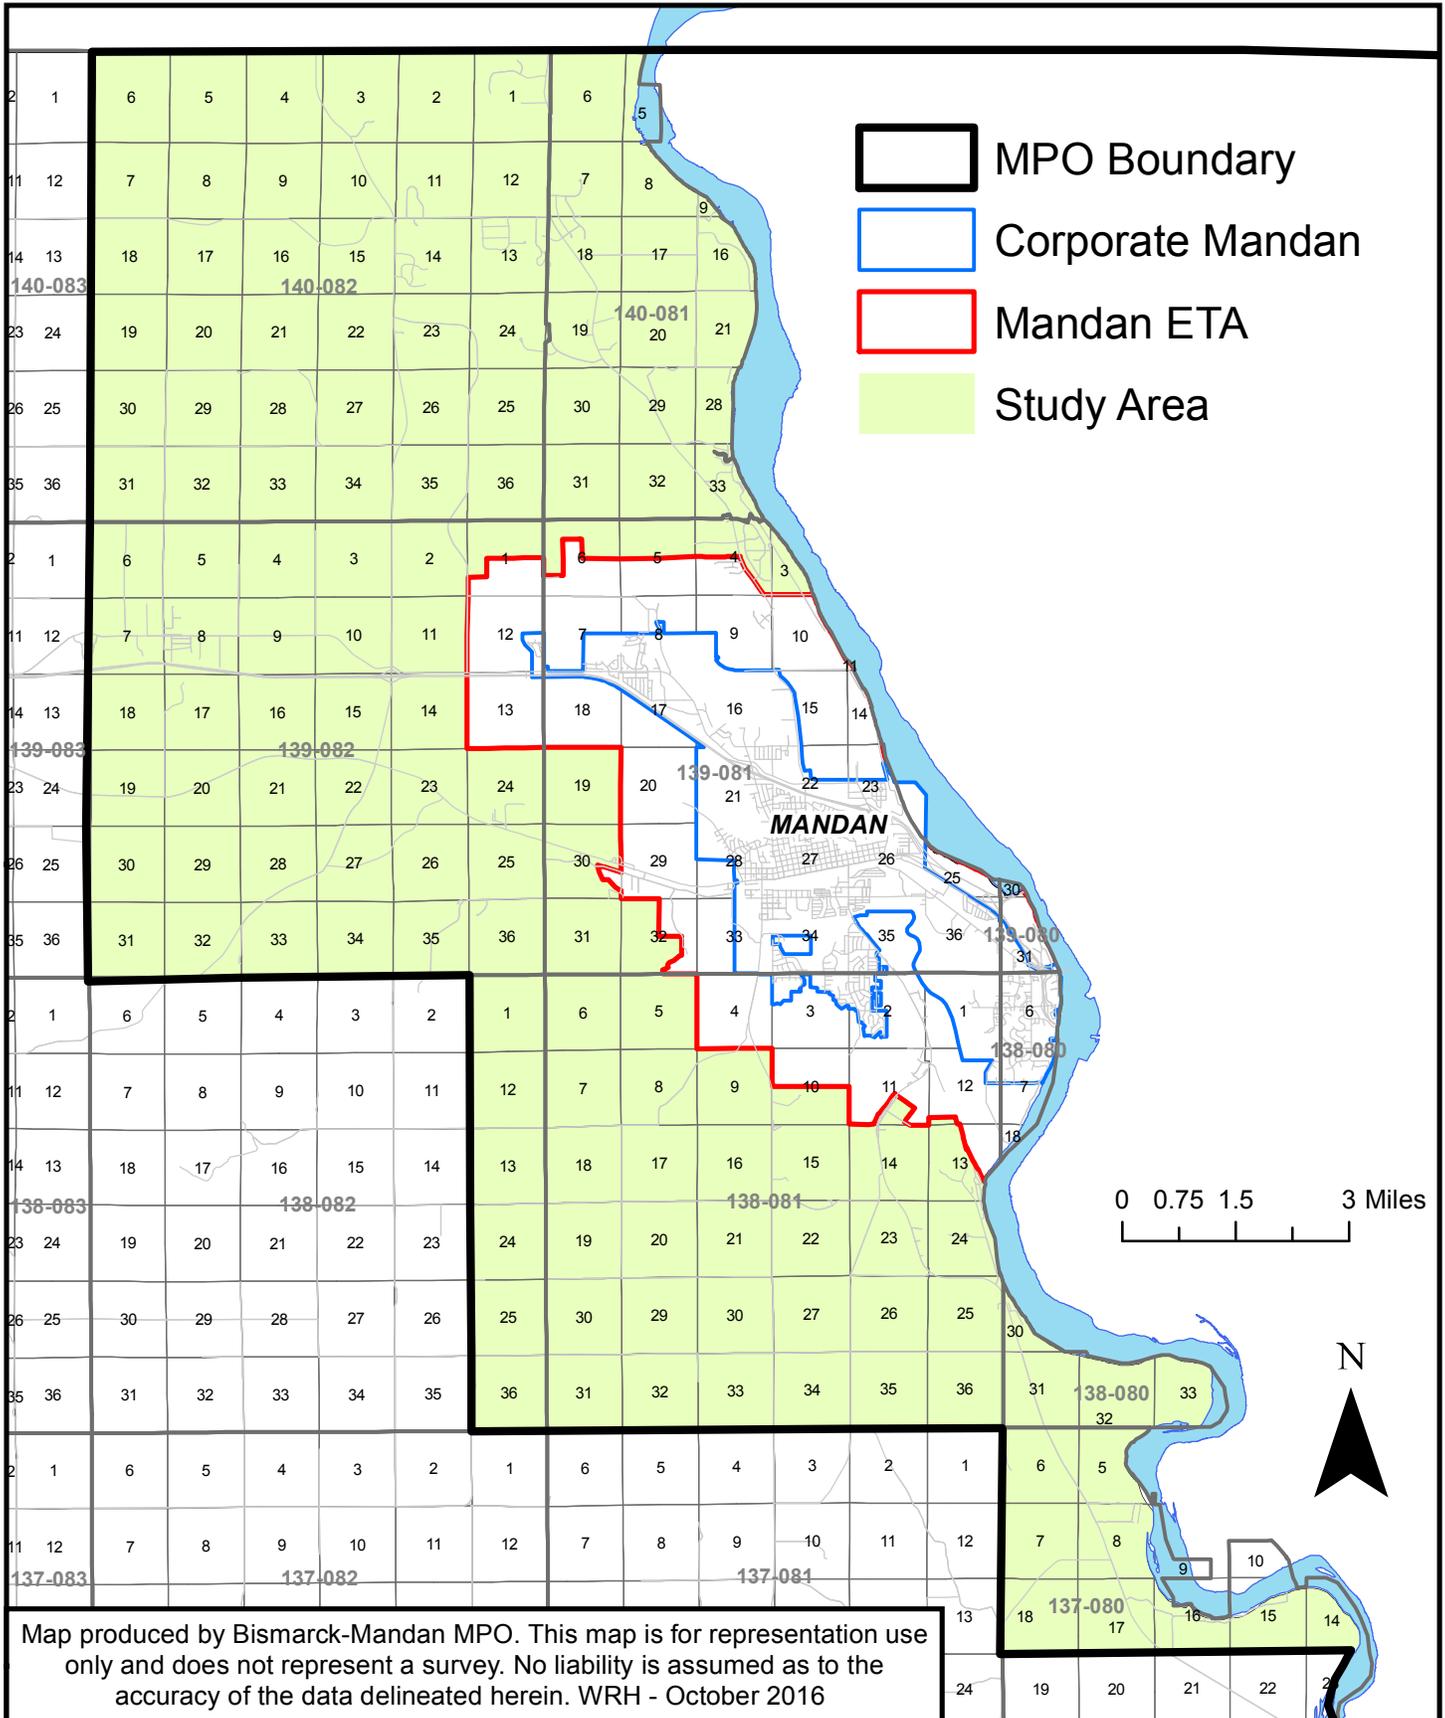

If the MPO determines that the progress of the Plan is not acceptable as measured through the consultant supplied project schedule, which will be an attachment to the signed and approved contract, the MPO reserves the right to terminate the contract with the consultant with a 45 day notice.

The MPO desires continuity of consultant staff throughout the project from the firm chosen. If the consultant replaces key staff and the MPO is dissatisfied with replacement staff, the firm chosen will have 30 days from written notice from the MPO to supply replacement key staff acceptable to the MPO. If the firm chosen fails to supply acceptable replacement staff within the 30 day period the MPO may cancel the contract.

## **Consultant Self Attestments**

## **Termination**

Applicability – All Contracts over \$10,000, except contracts with nonprofit organizations and institutions of higher learning, where the threshold is \$100,000

a. Termination for Convenience (General Provision) the recipient may terminate this contract, in whole or in part, at any time by written notice to contractor when it is in the recipient's best interest. Contractor shall be paid its costs, including contract close-out costs, and profit on work performed up to the time of termination. Contractor shall promptly submit its termination claim to the recipient. If contractor is in possession of any of the recipient's property, contractor shall account for same, and dispose of it as the recipient directs.

b. Termination for Default [Breach or Cause] (General Provision) If contractor does not deliver items in accordance with the contract delivery schedule, or, if the contract is for services, and contractor fails to perform in the manner called for in the contract, or if contractor fails to comply with any other provisions of the contract, the recipient may terminate this contract for default. Termination shall be effected by serving a notice of termination to contractor setting forth the manner in which contractor is in default. Contractor shall only be paid the contract price for supplies delivered and accepted, or for services performed in accordance with the manner of performance set forth in the contract.

If it is later determined by the recipient that contractor had an excusable reason for not performing, such as a strike, fire, or flood, events which are not the fault of or are beyond the control of contractor, the recipient, after setting up a new delivery or performance schedule, may allow contractor to continue work, or treat the termination as a termination for convenience.

c. Opportunity to Cure (General Provision) the recipient in its sole discretion may, in the case of a termination for breach or default, allow contractor an appropriately short period of time in which to cure the defect. In such case, the notice of termination shall state the time period in which cure is permitted and other appropriate conditions. If contractor fails to remedy to the recipient's satisfaction the breach or default or any of the terms, covenants, or conditions of this Contract within ten (10) days after receipt by contractor or written notice from the recipient setting forth the nature of said breach or default, the recipient shall have the right to terminate the Contract without any further obligation to contractor. Any such termination for default shall not in any way operate to preclude the recipient from also pursuing all available remedies against contractor and its sureties for said breach or default.

d. Waiver of Remedies for any Breach In the event that the recipient elects to waive its remedies for any breach by contractor of any covenant, term or condition of this Contract, such waiver by the recipient shall not limit its remedies for any succeeding breach of that or of any other term, covenant, or condition of this Contract.

e. Termination for Convenience (Professional or Transit Service Contracts) the recipient, by written notice, may terminate this contract, in whole or in part, when it is in the recipient's interest. If the contract is terminated, the recipient shall be liable only for payment under the payment provisions of this contract for services rendered before the effective date of termination.

f. Termination for Default (Supplies and Service) If contractor fails to deliver supplies or to perform the services

within the time specified in this contract or any extension or if the contractor fails to comply with any other provisions of this contract, the recipient may terminate this contract for default. The recipient shall terminate by delivering to contractor a notice of termination specifying the nature of default. Contractor shall only be paid the contract price for supplies delivered and accepted, or services performed in accordance with the manner or performance set forth in this contract.

If, after termination for failure to fulfill contract obligations, it is determined that contractor was not in default, the rights and obligations of the parties shall be the same as if termination had been issued for the recipient's convenience.

g. Termination for Default (Transportation Services) If contractor fails to pick up the commodities or to perform the services, including delivery services, within the time specified in this contract or any extension or if contractor fails to comply with any other provisions of this contract, the recipient may terminate this contract for default. The recipient shall terminate by delivering to contractor a notice of termination specifying the nature of default. Contractor shall only be paid the contract price for services performed in accordance with the manner of performance set forth in this contract.

If this contract is terminated while contractor has possession of the recipient goods, contractor shall, as directed by the recipient, protect and preserve the goods until surrendered to the recipient or its agent. Contractor and the recipient shall agree on payment for the preservation and protection of goods. Failure to agree on an amount shall be resolved under the Dispute clause. If, after termination for failure to fulfill contract obligations, it is determined that contractor was not in default, the rights and obligations of the parties shall be the same as if termination had been issued for the recipient's convenience.

h. Termination for Default (Construction) If contractor refuses or fails to prosecute the work or any separable part, with the diligence that will insure its completion within the time specified, or any extension, or fails to complete the work within this time, or if contractor fails to comply with any other provisions of this contract, the recipient may terminate this contract for default. The recipient shall terminate by delivering to contractor a notice of termination specifying the nature of default. In this event, the recipient may take over the work and complete it by contract or otherwise, and may take possession of and use any materials, appliances, and plant on the work site necessary for completing the work. Contractor and its sureties shall be liable for any damage to the recipient resulting from contractor's refusal or failure to complete the work within specified time, whether or not contractor's right to proceed with the work is terminated. This liability includes any increased costs incurred by the recipient in completing the work.

Contractor's right to proceed shall not be terminated nor shall contractor be charged with damages under this clause if:

1. Delay in completing the work arises from unforeseeable causes beyond the control and without the fault or negligence of contractor. Examples of such causes include: acts of God, acts of the recipient, acts of another contractor in the performance of a contract with the recipient, epidemics, quarantine restrictions, strikes, freight embargoes; and

2. Contractor, within 10 days from the beginning of any delay, notifies the recipient in writing of the causes of delay. If in the recipient's judgment, delay is excusable, the time for completing the work shall be extended. The recipient's judgment shall be final and conclusive on the parties, but subject to appeal under the Disputes clauses.

If, after termination of contractor's right to proceed, it is determined that contractor was not in default, or that the delay was excusable, the rights and obligations of the parties will be the same as if termination had been issued for the recipient's convenience.

i. Termination for Convenience or Default (Architect & Engineering) the recipient may terminate this contract in whole or in part, for the recipient's convenience or because of contractor's failure to fulfill contract obligations. The recipient shall terminate by delivering to contractor a notice of termination specifying the nature, extent, and

effective date of termination. Upon receipt of the notice, contractor shall (1) immediately discontinue all services affected (unless the notice directs otherwise), and (2) deliver to the recipient all data, drawings, specifications, reports, estimates, summaries, and other information and materials accumulated in performing this contract, whether completed or in process. If termination is for the recipient's convenience, it shall make an equitable adjustment in the contract price but shall allow no anticipated profit on unperformed services. If termination is for contractor's failure to fulfill contract obligations, the recipient may complete the work by contract or otherwise and contractor shall be liable for any additional cost incurred by the recipient.

If, after termination for failure to fulfill contract obligations, it is determined that contractor was not in default, the rights and obligations of the parties shall be the same as if termination had been issued for the recipient's convenience.

j. Termination for Convenience or Default (Cost-Type Contracts) the recipient may terminate this contract, or any portion of it, by serving a notice of termination on contractor. The notice shall state whether termination is for convenience of the recipient or for default of contractor. If termination is for default, the notice shall state the manner in which contractor has failed to perform the requirements of the contract. Contractor shall account for any property in its possession paid for from funds received from the recipient, or property supplied to contractor by the recipient. If termination is for default, the recipient may fix the fee, if the contract provides for a fee, to be paid to contractor in proportion to the value, if any, of work performed up to the time of termination. Contractor shall promptly submit its termination claim to the recipient and the parties shall negotiate the termination settlement to be paid to contractor. If termination is for the recipient's convenience, contractor shall be paid its contract close-out costs, and a fee, if the contract provided for payment of a fee, in proportion to the work performed up to the time of termination.

If, after serving a notice of termination for default, the recipient determines that contractor has an excusable reason for not performing, such as strike, fire, flood, events which are not the fault of and are beyond the control of contractor, the recipient, after setting up a new work schedule, may allow contractor to continue work, or treat the termination as a termination for convenience.
