

MAIN AVE RECONSTRUCTION

Plans are in the works to improve the stretch of Main Avenue between 25th Street and University Drive.

This project is needed to:

- Replace aging pavement and infrastructure on Main Avenue
- Improve system deficiencies
- Upgrade pedestrian facilities

The reconstruction project will include new pavement, pedestrian/ADA facilities, utility and drainage upgrades, and lighting improvements throughout the corridor. Alternative lane configurations are also being considered between 18th Street and University Drive.

QUESTIONS AND ANSWERS

When will construction start?

Tentatively scheduled to start in Spring 2024.

However, we are still very early in project development and this is subject to change. More detailed information will be available as we move through the process.

How will construction affect my commute and how do I access businesses on the corridor?

We are still evaluating options for work zone traffic control during construction.

However, you can expect it to be very similar to the recent downtown Main Avenue reconstruction, where Main Avenue was closed to thru traffic for a few blocks at a time.

Thru traffic detours may include nearby parallel routes such as 1st Avenue N. Business/property access along Main Avenue will be maintained during construction, using side streets and 1st Avenue S when possible, or through the Main Avenue work zone if necessary.

SEND AN EMAIL WITH QUESTIONS TO:

MainAve@flint-group.com.

We look forward to getting your input and ideas on how to improve this corridor.

Transportation
FARGO DISTRICT

Will you need additional right of way or easements from my property?

Yes, depending on the property location and alternative selected. It is likely that we will need additional narrow strips of right of way and/or easements from some properties to construct this project. We will have more detailed information as we move through project development.

Will there be changes to my driveway access to Main Avenue after construction is complete?

Private driveway access will be modified as part of this project. Changes could include closing, combining, or narrowing driveways. Driveways will also be modified to be ADA compliant where they cross sidewalks. Our team needs your input on how you use your driveways to help us make these decisions. We encourage you to work together with neighboring properties on access consolidation and closure options.

How will the project be funded, and who will be assessed?

Funding will be a combination of Federal, State, and City funds. A portion of the City's funding will come from special assessments, per the City's Infrastructure Funding Policy. It is too early in the project to know exact details of project costs, but information on the City's Special Assessment policies can be found at the following link:

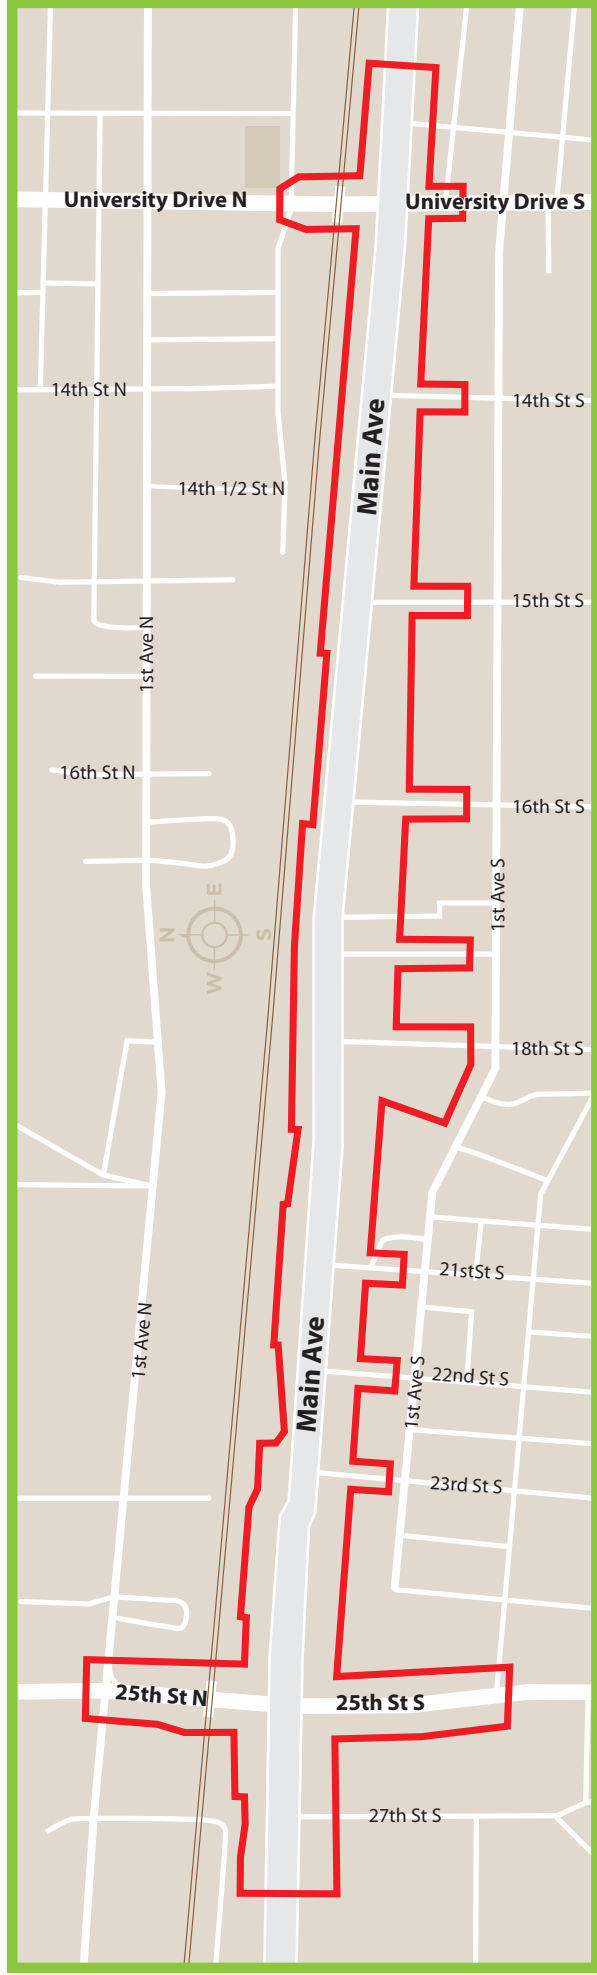

www.fargond.gov/specialassessments
