ND Highway 13 access change implemented east of Milnor

The North Dakota Department of Transportation (NDDOT) has closed a portion of 80th Street SE from 141st Ave SE east to ND Highway 13 east of Milnor. Federal Highway design standards used across the United States prefer intersections that intersect at close to 90 degrees. The high rate of speed which vehicles are exiting ND 13 onto 80th St SE and the occasional wrong way traffic creates concern for public safety. This fact along with a much safer intersection in close proximity makes this an intersection that can be closed with minimal impacts. The intersection at County 10 and ND 13 will be restriped to help guide motorists at that location.
