## **Load Limit on 80th Street Bridge east of Bismarck reduced**

The load limit on the 80th Street Bridge which crosses I-94 east of Bismarck has been reduced to a 10-ton weight limit, due to structural damage caused by a vehicle hitting the bridge structure. The 10-ton load limit will be in place from Burleigh County Hwy 10 north to 43rd Avenue until the structure can be repaired. Repairs are expected to be made sometime in February.

This situation will have no impact to traffic on I-94 at this time.
