PRECAST CONCRETE WHEEL STOP

Description:
Furnish and install concrete wheel stops in locations shown on the plans or designated by the Engineer.

Materials:
Use size 3, 4, or 5 coarse aggregate for concrete.

Construction Details:
Set precast wheel stop on top of pavement with both ends bearing evenly on the pavement. Drive an iron pin into the underlying pavement through the hole at each end of the wheel stop, if necessary, pre-drill a hole in the pavement.

Method of Measurement & Basis of Payment:
Include all costs for materials, labor, tools, equipment, and incidentals necessary to install precast concrete wheel stops at the locations designated on the plans in the unit price bid for "Precast Concrete Wheel Stop."

NOTES:

1. The number, size, and placement of bars may vary. Provide 1" minimum cover for bars.

2. Install reinforcing bars according to manufacturer's specifications.

3. Slots to allow for drainage and to allow units to be lifted with a forklift.

4. #7 x 18" iron pin each side.
