Structure Number: 01-104-21.0

Element / Env. / Description	Units	Total Qty	1 %	1-Qty St	2 %	2-Qty St	3 %	3-Qty St	4 %	4-Qty St

Remarks: 9/4/2007 - Structure Closed. NBI Remarks: 2 bridge end markers up. Rail on structure which is bent and pushed out. Stringers rusted and corroded. Poor channel alignment. Poor roadway alignment both directions of structure curves and no tangent lengths. Abutments deteriorating, spalling, and settling. Deck and curb show signs of cracking with north east underside of deck spalling out with steel showing. All gussets on west side are damaged from ice. Sway braces gone from 2 south sections ne corner of truss is twisted at bearing. Bridge closed 9/2007. Still closed 1/2008. Still closed 2010. 09/06/2011 - Bridge still closed. 11-7-2013 Bridge closed see picture. 9-2-2015 BRIDGE CLOSED 8/7/17 - Bridge remains closed 8/8/19- bridge remains closed, see archive pictures for any structural views. Bridge has been closed for 12 years now with no change, recommend removal from inspection list per bridge manual. - 8/8/2019

Alert Code 2: Settlement of the n.W. Corner of abutment is 8 inches. Causing deck to break on the corner. 1 to 2 feet of concrete deterioration on south abutment, see pictures. - 8/8/2019

Bridge Inventory - Structure Inventory And Appraisal Sheet

SEC 409

Structure Number: 01-105-02.0

Remarks: NBI Remarks: Rail on structure bent & pushed out. Stringers rusted and corroded. Minor undermining north & south abutment. South abutment wingwalls are cracked. East side of pier 2 has broken off held in place with wire. West stringer of span 2 is spliced at center and bent. 09/08/2011 - Embankment erosion around south wingwalls. Diaphragm concrete is spalling at abuts and pier. East 2 stringers of span 2 are bent. 8/16-19 - load limit signs are different from each other one is 15 ton the other is 20 ton see pictures. NW wing is broken completely through near end, slope protection is mostly gone w/ exposed footing on north abutment & north side of pier. timber bridge rail is in place for the most part w/ the sw end having a large piece broken half off. - 8/16/2019

Alert Code 2: Pier 2 has concrete delamination and spalling with exposed rebar. - 8/16/2019

Notes: All remaining wings wearing to the point of being un functional. - 8/8/2019

Remarks: 9/11/2007 - South curb concrete deteriorated and crumbling. Steel exposed. NBI Remarks: No bridge markers are up. Stringers rusted and corroded. Bottom lateral bent disconnected. One hundred percent of steel badly rusted and no paint on structure. Structure and roadway are fenced off on east side. Concrete curb is deteriorating, steel exposed. Bottom layer of metal under deck is badly rusted and has many areas that have deteriorated. Minor section loss of most rivet heads. 05/02/2012 Bridge closed by county. 11/20/2012 - Bridge closed signs in place on each end of bridge. 7-20-2013 Bridge still closed. 5/2016 - Bridge closed. 8/7/17 - Bridge remains closed. County removed metal bridge rail to weld across opening on either side & hung the road closed signs on. 8-8-19-Remains closed. Recommend removal from inspection listing unless replaced. It is getting extremely difficult to even get to this structure anymore and has been closed for 7 years with nothing being done to it. - 8/8/2019

Alert Code 1: STRINGERS RUSTED AND CORRODED. PROTECTIVE GALVANIZED LAYER FAILING, THUS CAUSING RUSTING ON CORRAGATED STEEL SHEETING UNDER DECK. ALL STEEL HAS MODERATE RUSTING. PLATES BENT AT U1,L1 AND U2,L2 ON NORTH SIDE, BOTTOM. CONCRETE SPALLED AT ALL 4 CORNERS WHERE WINGS TIE IN. - 8/8/2019

Alert Code 2: CURB & GUTTER SEVERELY DETERIORATED WITH EXPOSED REBAR. - 8/8/2019

Alert Code 3: EAST ABUTMENT HAS SEVERE CONCRETE DETERIORATION WITH EXPOSED & DEBONDED REBAR. CONCRETE BELOW WATER LINE SEVERLY DETERIORATED AT BOTH ABUTMENTS. 8/7/17 - East abutment failing where connected to wing NE side. - 8/8/2019

Bridge Inventory - Structure Inventory And Appraisal Sheet

SEC 409

Structure Number: 01-113-04.0

Structure Number: 01-113-04.0

[illegible]

Structure Number: 01-113-04.0

Remarks: 9/11/2007 - 6' of deck runner deck plank missing. Other outside runner damaged. NBI Remarks: New deck plank on deck double over driving lane. Bottom chords on both sides of bridge are bent. North outside beam also bent in. Bottom cross rods bent and some broke. Concrete deterioration on both abutments on bottom. 5' section of 1 running plank missing. Sw top chord pin nut away from chord 1/2". See pix. 05/03/2010 - Bridge closed. 09/02/2011 - 6" - 1' drop from deck to roadway. 09/02/2011 - No barricade or closed signs up. Talked with Theo and it's still supposed to be closed. Theo will go put barricades back up. 11-8-2013 BRIDGE CLOSED, ROAD HAS BEEN REALIGNED AND LOW WATER CROSSING INSTALLED WITH 3 CSP PLACED. 9-2-2015 BRIDGE STILL CLOSED. 8/7/17 - Bridge still closed. Beam (3rd in from N) missing & laying on top of bridge. Beam (3rd in from S) bowed out on W side touching adjacent beam. 8-21-19- bridge remains closed vegetation leading to bridge end, road goes to low water crossing then turns into field trail. Recommend removing bridge from inspection listing, or change status to the low water crossing if it meets criteria. - 8/21/2019

Alert Code 1: 8 rivets missing in 2 locations along north top chord. 09/02/2011 - SW bottom chord pin pushing out from bridge 1/4". One missing rivet and 3 loose in same area. - 8/21/2019

Alert Code 2: Exposed rebar on both abutments. - 8/21/2019

Fracture Critical: A fracture critical inspection was not done as this bridge has been in closed status for 9 years with nothing done to it for improvements. For previous information see archived records or view remarks below. - 8/21/2019

Notes:East beam not sitting on bearing seat - 8/20/2019										

Remarks: 9/5/2007 - NW & SW corner of abutment settled. NBI Remarks: Low water crossing. No bridge end markers or curve signs. NW corner of abut has settled 6" to 1'. East beam not setting on bearing seat. North abutment wall has vertical cracks. 09/08/2011 - Some exposed rebar on top east. 08/07/2014 - Bridge closed. 9-2-2015 BRIDGE CLOSED. 8-20-19- The bridge to the west of this structure has/is closed, this low water crossing has been in it's place since 2006. The low water crossing is not closed, it could use some signing. Could not see cracking on the bottom of the girders or the North abutment this round due to water being so high under the structure. - 8/20/2019

Remarks: NBI Remarks: Erosion in ditch northeast corner. Some riprap placed in eroded ditch channel. Banks have a sharp drop off on bottom of riprap. Channel banks by abutments have riprap. 10/2010 - Minor staining on bottom of deck.. 6/9/2014 - Because of sandy soil north abutment embankment is being washed away, and undermining rip rap causing it to fall into channel.

Remarks: NBI Remarks: Erosion back of connection between wing and abutment in SW corner. Slight settlement of a couple of north abutment piling. Cable has been attached from first abutment pile in NW corner to wing pile. Moderate channel scour under and to west of bridge. south abutment, third piling from west, is split & leaning towards creek. Piling 1 & 6 in north abutment leaning outward 3". 11/2018 - Load Limit Signs Missing.

Alert Code 1: 6' of SW abutment cap starting to dry rot.

Alert Code 2: Wingwalls attach to structure approx. 2.5 feet in from deck edge leaving vertical drop back of abutment extremely close to traveled way. Bottom of south abutment completely exposed by scour. Bottom of abutment planks pushing toward channel due to lack of support.

Remarks: Bridge located on section line trail. No timber bridge rails. Wing piles have several vertical weather cracks. 3-4' deep scour under and adjacent to bridge. Abutment footings not affected so far. No end markers. Bridge approaches moderately rough. Back of both west wingwalls unsupported from washouts. Erosion of channel on south side, not affecting bridge yet.

Alert Code 2: 2' x 2' x 5' sinkhole in SW corner exposing back of abutment.

Remarks: NBI Remarks: One split piling in NW wingwall. No bridge rails. No end markers. Moderate silt deposit under west half of bridge. Scour at end of SE wing being caused by intersecting road ditch. Small washout by NW wing. 4'x6' arched pipe installed 25 ft. north of bridge. Several 2"x3" spalls found along bottoms of channel beams; small sections of reinforcing exposed. Spall developing along bottom of entire length of 7th beam from west.

Alert Code 1: Scour hole at SE corner of south abutment and along SE wing.

Remarks: NBI Remarks: No bridge rails; curbs partially obscured by tall grass. Minor weather checking of structural members. Minor dirt deposit on east abutment cap. Riprap placed along abutment, moderate channel scour around pier. Sway brace broke on east side of pier. Span 1, girder 7, 8, & 9 have longitudinal cracks. Span 2, girders 1, 6, 14, 16, and 20 have diagonal or longitudinal cracks. Some cracks originate at ends of girders where they bear on east abutment cap. Pier 2 has long deep weather check length of cap.

Alert Code 1: 1-2" of backward rotation of east abutment cap has caused vertical splits in a few abutment piling. All piling in structure have mod. - severe decay.

7000/1:Damage	each	1	0	0	100	1	0	0	0	0

Remarks: NBI South curb missing. Abutment back plank have minor shifting. Second pile, from south, west abutment has large vertical check. North pile, west abut., has moderate weather check. Centers decaying in wing pile. Severe decaying in NW wing wall piling. Small washout back of SE wing. Moderate erosion of both sides of west approach roadway. NE wing horizontal plank is broken & so is vertical plank. No end markers. Span 2- Girder 9 and 20 horizontal crack. 10/11/2018 - North rail is missing. Load Limit Signs missing. Posted 4/17/19 per LG nmh - photo

Alert Code 1: Void sounded behind upper half of west abutment. Void extending under west bound driving lane.

Alert Code 2: Bottom of west abutment exposed nearly entire length, from channel scour. Some misalignment of abutment back plank. Moderate sink hole at NW corner of bridge.

Remarks: NBI Remarks: Ninth girder, from east, cracked in two diagonally (span two). Abutment caps have large vertical cracks in NW and SE corners. Moderate washouts at outer end of all wing walls. South abutment leaning back 9.5" in SW corner. Bottoms of some of the planks shifting inward. Some scuffing of timber members from ice or debris. Some scour in south span, poor channel alignment. Dirt deposits on both abutments caps from gaps in back planks. Cap does not bear on outside two piling in NW and NE corners of north abutment; appears to be supported by spikes through cap. Piling in both abutments shifted inward so 1/2 caps width bearing on piling. Sway braces cracked. Large washout back of NE wing. Utility cable attached to west side of deck.

Alert Code 1: Bottom of south abutment partially exposed. 12 "x 12" hole in the 1st deck plank in NW corner.

Alert Code 2: 6" of settlement to west end of pier two. Sink hole in SW 1 1/2' x 1 1/2' x 4', sink hole in SE 1' x 1' x 4', both exposing back of wing and abutment.

Remarks: NBI Remarks: Structure located in middle of short, sharp "s" curve. North end of sway bracing is split. First girder both spans, south side cracked diagonally around railing post bolts. Moderate channel erosion due to poor channel alignment. Center decaying in north piling in east abutment. Span 1, girder 11 has several longitudinal cracks where it bears on abutment one. NE end marker missing.

Alert Code 1: East abutment tipped back 4-6". West abutment cap tipping back. This stress is starting to split tops of abutment piling. Piling 5 in west abutment split 3'.

Remarks: Element 30 - Paint system failure. NBI Remarks: Bridge was reconstructed 11/90. Additional piling driven in both abutments. Dead man anchors installed. Horizontal brace, for north abutment, is cracked. Wings are slightly twisted. A few small spalls on under side of new quad T-beam deck. End markers are broke off. NW, NE, & SE corners of deck exposed due to varmit burrow.

Alert Code 2: 10/10/2018 - Void from runoff at NE & SE deck corners where wings attach.

Remarks: NBI Remarks: Damaged girders repaired with an adjacent girder. Timber diaphragms installed between girders at both abutments. Girder ends in SW corner do not bear firmly on abutment cap but remain wedged against backwall planks. A shim (1" board) was placed under one of girders. Remainder of girders rest firmly on cap. Short, vertical splits in top two to three feet of several of piling. Outer ends of north wingwalls heaving upward. Top horizontal braces in NE and NW wings are split. Girder 4 & 17 have longitudinal crack and girder 6 has diagonal and longitudinal cracks developing. Centers decaying in NW & NE wing wall piling. SW corner deck plank missing (2'x1') allowing dirt to collect on cap. SE corner of deck plank is separated allowing dirt to collect on cap. Abutment 1, cap is twisted. 4th pile in East abutment split and repaired with metal brackets. 01/20/2015 - West abutment rotating forward on south half. Gap in planks at mid-point in west abutment. 10/10/2018 - North bridge rail is split from NE corner to middle of bridge. Load limit signs in poor condition.

Alert Code 1: 10-10-2018 - 1 x 1 sink holes in NW corner of deck and center of roadway on East edge of deck.

Alert Code 2: Abutment 2 cap not bearing piling 1 & 4 (1-2" gap).

Remarks: NBI Remarks: Large spacing between deck planks has let large deposit of dirt and gravel collect on west abutment cap. Plank, across west end of girders, has slipped down and approach embankment also sifting onto west cap. Girders extremely weathered approach embankments moderately eroded due to poor channel alignment to north of bridge. Large washout by NW wing. Span 1 girder 7, 8, 12, & 24 cracked diagonally. Span two, girders 5, 13 & 16 cracked. Several piling with vertical weather checks. Several longitudinal weather checks in pier cap and west abutment cap. Both abutment caps have minor to moderate rotation and bear on back edges of piling. Horizontal crack adjacent to knot in girder 12 in span one. No end markers. Timber curbs decayed. 1-19-17 E. half of S. rail down. N. rail all collapsing. 10/10/2018 - Load limit signs in poor condition.

Alert Code 1: Gaps, between shifting abutment back planks, is allowing some erosion of embankments. North pile in pier has severe interior decay. West abutment cap bearing on piles 1, 2, & 4 only.

Remarks: NBI Remarks: Some channel scour through spans two and three. Outer corners of north abutment exposed as back planks at these locations shorter than the rest. Sway braces on pier 2 are cracked. Longitudinal crack in south abutment cap. Both abutments leaning back 4-6". Caps are bearing on back half of abutment piling. Vertical splits are starting at top of some piling. Girders 3, 9, and 10 span one and 5, 9, and 10 span two are cracked longitudinally. Bottom horizontal brace broke back of west piling in south abutment. Minor to moderate void behind abutment 4 in SW & SE corners. Abutment 1 horizontal brace cracked. Pier 3 sway brace is broke. No end markers. South end deck plank damaged.

Alert Code 1: There are short to medium length splits in following listed piling (from west) abut. one 1, 2, 4, 5; pier two 2, 5, 7 pier three 7 and abut. four # 1.

Alert Code 2: 10/10/2018 - Abutment 4 cap rotated back 6" bearing only on back edges of piling.

Remarks: NBI Remarks: In span 1 girders 6, 8, 11, 13 are doubled. In span 2 girders 5, 7, 11 and 13 are doubled. Large rip rap has been placed along all wings and both abutments. Intersecting road ditch has left large silt deposit at NE corner of bridge. Tops of NE and SE wings moderately damaged by snow plow. 1st and 2nd piling (from east) south abutment has two long deep weather checks. Several other pile have deep weather checks. Long horizontal cracks on underside of both pier caps; triggered when caps were spiked to piling. First section of bridge rail tore loose in NE corner. No end markers. Girders 1, 2 & 12 span 2 and girder 13 in span 3 have longitudinal or diagonal cracks. Span 1, girder 1 cracked. 5th pile from east, south abutment, outside half not bearing on cap.

Alert Code 1: SE wing severely twisted and beginning to break up.

Notes: _										

Remarks: 12/18/18- ALL PARAPETS ARE CRACKED WHERE WINGS AND PARAPETS MEET. VERTICAL CRACKS IN ALL WALLS. Minor spalls on SE & NE corners where headwalls & exterior walls meet. Banks & channel are heavily vegetated.

Alert Code 1: Longitudinal cracks where wall meets roof. 12/18/18: NW & SW corners have a major crack on both of them where wings and headwalls meet. Each are 1/4" to 3/8" wide & extend down into the exterior walls 1 ft diagonally. NW corner on headwall has a 6" spall with 3" of #7 rebar exposed. No measureable section loss. 12/18/18- Crack at NW corner is now 1.5" wide and 6" long.

North Dakota Department of Transportation

Bridge Inventory - Structure Inventory And Appraisal Sheet

SEC 409

Structure Number: 09-103-08.0

Remarks: Minor scour under structure. Paint peeled to shop coat - 70% of surface area. South curb and rail are 2 1/2" out of alignment at pier 10/12/17 . NE cap has minor fire damage. Pier diagonal braces are bent & disconnected. Many areas of exposed steel on bottom of girders. Girder 1 E & 2 W are spalled. Top of girders are spalling at pier. NE wingwall replaced 10/15. Structure posted for 29 Tons from west only and sign is illegible. Old pile in channel. Erosion behind East wingwall and East abutment corners. - 7/1/2019

Alert Code 1: Top backwall planks are pulled away from deck. Piling have rust, with minor section loss at waterline. South curb and rail are 2 1/2" out of alignment at pier 7/1/19. - 7/1/2019

Bridge Inventory - Structure Inventory And Appraisal Sheet

SEC 409

Structure Number: 09-119-35.1

Notes:Weathering cracks throughout timber bridge rail - 10/4/2019											
7357/1:Pack Rust	each	1	0	0	100	1	0	0	0	0	0
Notes:Pack rust on the top of steel truss - 10/4/2019											
8401/2:Wings	each	4	100	4	0	0	0	0	0	0	0

Remarks: NBI Remarks: 4 x 8 flex end markers sw, nw. Minor vertical & horizontal curve to north, Moderate horizontal curve to south. PVC conduit on west curb. Posted 5 ton per axle, 12 ton gross. Pier 2 & 3 caps are split. Fracture critical inspection done 10/17. Inspection was done with a hammer, extendable mirror and a ladder to get within arms reach. - 10/4/2019

Alert Code 1: Entire structure has varying degrees of rust. Knee braces no. 2 & 3 Lt. & no. 3 Rt. are bent. u3L3, u2L2 Lt. & u2L2 rt, and south end of left upper chord have minor collision damage. Bottom of south backwall is exposed. Pile No. 5, Abutment 1 is split. NW, SW, and SE anchor bolts at ends of the truss are gone. - 10/4/2019

Remarks: NBI Remarks: No end markers. Old piling in channel. Moderate channel erosion - east. Heavy channel vegetation - west. Laminated deck planks are pulled 1"-2" apart at south end of deck, which is allowing dirt and gravel to accumulate on south abutment cap. Scour under structure has exposed bottom plank of both backwalls. Paint peeled to base metal - rust evident 95% of surface area. Pile 6 in north abutment is split. South backwall beginning to lean south. - 12/17/2019

Alert Code 1: Sections of rail at NW and SE corners of the bridge are gone. Moderate embankment erosion behind SW & SE wingwalls. - 12/17/2019

Bridge Inventory - Structure Inventory And Appraisal Sheet

SEC 409

Structure Number: 09-125-33.2

Remarks: Double b&a end markers on approach corners. Structure is located at a "t" intersection. Posted for 15 mph & has "t" signs south and east. Sharp horizontal curve to the west. Old piling in channel. Sheet pile dam in SE drainage channel. Posted 5 ton per axle 12 ton gross NW only. Abutments have been replaced 12/12 with 5 steel h-pile each abut. West abut. pile 4 is missing a weld to the cap. Abut. caps are steel h-pile. New south metal & timber rail. All pile showing weather cracking. Rust evident 85%. Laminated deck planks are pulled apart 1"-2" between pier 3 & east abutment. - 10/22/2019
