Remarks: 11/5/18 - South abutment sounds hollow 0-5' up. 3" of undermining. Fence under structure across west opening. Steep and narrow inslopes at bridge ends. South abutment bowing slightly just at pile. Both abuts have some fill loss. South backwall backing plank exposed due to minor scour only 3" up from bottom. South wall undermined. NW wing leaning, SW wing pulled away from pile, SE wing has a broken top plank.

Alert Code 2: Scour at south abutment causing fill loss from behind abutment. Fill from back side of south abutment is now pushing on abutment and cracking timber columns. 01/19/17 - 2 of the 5 columns (w1&w2) are showing extensive decay which may affect the load capacity of the colum and SW & NE hazard markers missing.

6000/2:Scour	each	2	0	0	100	2	0	0	0	0

Remarks: 11/6/18- S-5 has no bearing on Pier 2. Deck is overlaid with 12"x7" timbers entire length of structure. Center of deck. Poor roadway alignment both directions due to horizontal curves. NW bank is eroding some. continued river bank erosion downstream.

Alert Code 2: 11/6/18 - The NW corner of the River bank is now eroded to be 10 feet from the edge of the road near the bridge. Tree roots are all that's holding the remaining fill from being eroded from behind the NW wing. Poor channel alignment downstream is causing severe erosion around structure during periods of high water flows.

1080/3:Delamination/Spall/Patched Area	each	1	0	0	0	0	0	0	100	1
Notes:SW wing - 9/11/2019										
1130/3:Cracking (RC and Other)	each	3	0	0	100	3	0	0	0	0
Notes:NW, NE, SE wings have cracking with delamination/ scaling - 9/11/2019										

Remarks: Fracture critical inspection. Pack rust forming and starting to bend gusset plates. None are loose yet, and no rivets have failed. Gravel on bottom chord from blade creating moist environment. Fracture critical inspection shows pack rust on bottom chord gusset plates north end both sides. North abutment has advanced scaling at water line with rebar exposed. E corner N abut has 4' hole at corner 3' above waterline. - 9/11/2019

Alert Code 1: moderate rust evident with 10- 20% section loss @ small areas including bottom chord at corners both trusses. - 9/11/2019

Alert Code 2: Vehicle damage has occurred to the west side of the truss. The vertical members at I3 and I4 are bent. Ne corner of N abut has advanced scaling section loss 3'x 3 the rest of the backwall entire width has 6" to 1' loss. South abutment has advanced scaling section loss 3' x 2' NW corner. Concrete is like gravel. - 9/11/2019

Alert Code 3: Underside of deck has significant spalling with exposed rebar and significant section loss at floor beams. Other areas between the floor beams have the same spalling conditions. Large spalls @ NW,NE & SE corners of abutments under bearings. The diagonal from I2 to U3 is bent and U3 to L4 is broken off. - 9/11/2019

Critical Finding Diagonal member from U3 to L4 is broke off. Rating of bridge should be looked at. - 9/11/2019

Fracture Critical: Diagonal member from U3 to L4 is broke off. The vertical members at I3 and I4 are bent - 9/11/2019

Remarks: 9/12/2007 - All Joints wider at top than bottom. West barrel up to 5". Wings and joints need to be watched. NBI Remarks: All construction joints open 1 to 3". Minor cracks in walls fill loss at construction seems to be the same as past inspections. West barrel has longitudinal crack along roofline the entire length. Sw wing has previous repair for separation, the bottom of repair has broken away leaving 1 x 2' void with steel exposed.

Alert Code 1: Tie back cable is holding up wing and wing has stress crack where tie back is located. 12/06/2012 - NW wing is 2' to 3' away from box and scour is still active and is now 8' past the end of the box. 4/5/2018: The NW wing has separated from box. the cable tie back is exposed and dangling, giving no support. The major erosion upslope from the wing has expanded.

Alert Code 2: All wings pulling away, ne wing has 7'x1' spall steel exposed bottom of ne wing is pushing inward toward channel. four feet of fill loss from north construction joint. fill loss 4' in middle joint west wall. the north section of box is settling, top joint open 4". 11/2/2016 - NE wing is completely separated from the box. A cable tie back is the only thing holding the wing up. NW wing is separated, there is also a 16' x 6' long x 8' deep scour hole behind the wing. The cable tie back holding the wing up is exposed because of the erosion and appears to be ineffective.

Remarks: 10 pile non-load bearing South in each abutment. New NE wing. East abutment wall straightened. New dead men under East abutment. East abutment leans 2" in 4 feet. 03/04/2009 - 2'x 3' fire damage east abutment and 20% section loss on south pile east abutment fire damage. Poor sight distance both ends due to horizontal curves. Timber holding piling in line has ice damage on both abutments. Some longitudinal cracking on the top of three box beams. South piling east backwall has old fire damage, top 3' approximately 20 % section loss. 10/31/16 - N/S Box beam fascia has numerous 4" - 6" spalls. NW wing has a board with 5' split. timber holding west piles has 6' split. Second pile from N on East abutment shows signs of crushing. But pile is tied to abutment.

1130/3:Cracking (RC and Other)	each	1	0	0	0	0	100	1	0	0
Notes:Top of NE wing is all cracked and soon will spill off. - 9/17/2019										

Remarks: Possible wheel trap on edges of deck that has hole and side missing. remainder of deck still serviceable. Steel beams encased in concrete. Rail completely gone. Hairline cracks both vertical & transverse with a 3" wide x 1' long spall on north backwall concrete between beams, south backwall, has some spalling. SW wing starting to separate, 1" wide down to hairline in 8'. no end markers, Scaling on south abutment, moderate, 6' long 2' wide 1" depth. 5 ft X 3 ft concrete broken off of SW corner of SW wing. Erosion by SE wing 5 ft deep, 10 ft long, 2 ft wide on top. West girder is seperated from deck and has lost all structure integrity. Barb wire gate on west side of bridge 7/2017 - Bridge to be replaced with a triple box. - 9/17/2019

Alert Code 1: No end markers. - 9/17/2019

Alert Code 2: Deck has hole NW corner 4' long 8" wide. hole is at the corner and out of the wheel tracks. The West side of deck is all gone for entire length of bridge and 8 inches wide. - 9/17/2019

Alert Code 3: West girder is separated from deck and has lost all structure integrity. - 9/17/2019

Remarks: NBI Remarks: Minor ice damage and spalling to north pier. Backwalls and wings have hairline vertical and diagonal cracks. Minor honeycomb on underdeck of south span. Minor vertical crack to center of south pier. Minor transverse cracks in both curbs. Random hairline cracks in deck surface. Medium vertical crack at center of north abutment face. Channel runs from 10 feet south of north pier to face of north abutment. 2 foot deep scour at upstream end of north pier. Entire footing exposed on north abutment. Minor to moderate scaling on north pier and north abutment face. Minor random cracks in north abutment face with minor efflorescence. Numerous minor diagonal cracks in northeast wingwall with minor efflorescence. 11/2012 – End marker down at NW corner. Popouts in deck surface. Severe collision damage to railing end post at NW corner. Minor scour on south side of south pier. 11/2014- 11/2014- East side of North pier has ice damage- All water channeling under north abutment, water high so footing could not be seen.

Remarks: Date 12/02/2004 - 14" inward movement of south abutment. South abutment settled approx. 1 1/2". 11/09/2006 - No change in movements. NBI Remarks: Poor horizontal roadway alignment. Concrete spalling along bridge seat south abutment. Vehicle damage to west railing. Southeast wing spall exposing reinforcing steel. Erosion behind southwest wing. Channel bank sloughing up & downstream both sides of bridge. Sediment buildup under structure. Channel runs along north abutment. Beaver dam just east of structure.

Alert Code 1: Open vertical cracks south abutment-center crack open 1" to 1 1/2", west crack 1/4". South abutment bows in approximately 2" - 3" @ center.

Alert Code 2: South abutment moved inward 14". 5/8/12 - South abutment moved inward 15" measured @ the SW corner - continued inward movement of the south abutment. 5/2/2014 - South abutment moved inward 17" measured @ southwest corner - continued inward movement of south abutment observed in 2014. 5/2016 - No additional inward movement observed in 2016 or 2018. Open vertical cracks south abutment-center crack open 1" to 1 1/2", west crack 1/4". South abutment bows in approximately 2" - 3" @ center.

Remarks: NBI Remarks: No railings. No curbs. 5/7/2014 - County forces added some new wing planks to 3 of 4 wings. County forces repaired erosion areas near north wings & north channel bank near structure. Rock riprap added @ both north wings - See photos. Some bowing inward lower portion both abutments. 5/2016 - in 2015 under contract channel clean out, repaired both end deck planks, added riprap to the south wings, thru channel under structure. Riprap spillway 300' east of structure. Metal culverts added under approaches west side near structure. Spillway 1000' west of structure.

Alert Code 1: Pile #4 south abutment cracking at the water line - See photo.

Remarks: 12/17/2008 - Lean measurements on abutments unchanged. NBI Remarks: No railings. Channel erosion upstream and downstream. Cracking with minor spalls between girders both abutments. Small diagonal cracks in abutment wall toward wing corners both abutments. Channel bank erosion near the northeast wing. 11/2010 - No change in lean. 6/2016 - Two BEM'S missing. 5/2018 - 30' x 40' x 2.5' deep scour hole along south abutment.

Alert Code 1: South abutment moving in at the bottom and leaning away 3" in 4' north abutment moving in at the bottom and leaning 1 1/4" in 4'. Top portion of both north wings breaking away exposing reinforcing steel. Top of north abutment moving in approximately 2" - 3". 5/12/2012 - No change in lean measurements. 5/6/2014 , 2016 or in 2018.

Remarks: Date 11/18/2002 - 12 ft. metal bridge rail missing due to collision damage. NBI Remarks: No bridge end markers. Sidewalk faulted 6" both ends. Vehicle damage to railing northeast corner. Deterioration of southwest wing concrete with up to 7" of section loss. Scour hole under structure, 10' x 30' x 1.0' deep.. Some tree growth removed near channel in 2011. Metal railing both sides repainted in 2013. Some areas of concrete curb repaired in 2013.

Alert Code 1: Scaling and deterioration of the east abutment concrete with up to 2" of section loss. Cracking of center pier cap - both ends.

Alert Code 2: Deterioration of concrete at the west abutment with up to 4" of section loss with exposed reinforcing steel to the lower portion. Deterioration and scaling with section loss to the lower portion of both piers exposing reinforcing steel.

Remarks: NBI Remarks: New deck in 2001. North wings are tied back with deadman. Poor horizontal and vertical roadway alignment. Vehicle damage to timber curb east side south end. Bump at both bridge ends. Channel bank erosion near SE wing. Diagonal crack upper NE corner north abutment. 5/2018 - Tree debris in channel near SW wing. Some minor inward movement at the south abutment.

Alert Code 1: East outside girder bowed outward. Northwest wing severely cracked and spalled with exposed reinforcing at wing corner & moved away from backwall approximately 1 ft. Scour hole under structure, 10' x 20' x 2' deep.

Remarks: NBI Remarks: Girders 1, 4, 7, 9 and 13 are bowed. Rusty girders. Rotting deck planks with some replaced. East outside girder bent. Pitting with minor section loss to bottom flange-girder #3. Top wing plank of northeast wing missing. Some new deck planks added in 2004. 11/2010 - Curb missing both sides north end. Channel runs along south abutment. 5/1/14 - In 2013 county forces repaired southwest wing with new planks & 1 new I-beam pile. Rock riprap added around both south wings. - See photos. One BEM missing southwest corner. 5/2016 - In 2015 the county installed new timber curb east side, did a channel cleanout, placed riprap under structure, along south wings, along channel bank west of structure and spillway 300' east of structure.

Remarks: NBI Remarks: No railing. Corners have now been tied down with deadman. Minor ice impact damage to bottom flange girder #8. 10/2010 -No change in lean measurements. 5/10/2012 - Channel cleanout both sides in 2011. 5/28/2014 - Rock riprap placed @ front of both north wings - See photos. 6/2016 - 2015 the county placed riprap thru channel under structure both banks and channel east of bridge, north bank west of bridge and erosion control blanket south bank west of bridge. See photos 8/28/2018 - County straightened all girders that were tilted. Replaced deck and added new timber curb. Inspection incomplete in November due to Inspection of Incomplete October 2019 County Structures. Inspection completed 12/2/2019. - 12/2/2019

Alert Code 1: South channel bank eroding, sloughing just east of structure. Pile #4 south abutment cracking near bottom. See Photo. - 12/2/2019

Alert Code 2: Northeast corner of north abutment leans 4 1/2" in 4'. No change in lean measurements in 2012, 2014 or 2016, 2018 and 2019. - 12/2/2019

Alert Code 3: 8/28/2018 - SW corner of the south abutment leans in 8" in 4', 7.75" in 4' before. 12/2019 - SW Corner of South Abutment leans 8 1/4" in 4' Previous Inspection 8". Additional lean observed. - 12/2/2019

Remarks: NBI Remarks: No railings. New timber deck and curb in 2015. South abutment piles bowed back. County has replaced the west outside pile with a 12" round metal pile and welded a 12" h-pile to the top of the pile and the bottom of the metal cap at center pier in 2004. Minor cracking lower portion pile #2 south abutment. 10/2010 - Riprap placed @ culvert where it enters the channel near the SW wing. 11/2015 - In 2015 county forces repaired the south abutment and placed riprap at the south abut. New timber caps both abutments and center pier,new timber deck,curbs and running deck planks. 4/24/2018 - Embankment erosion behind SW wing.

Remarks: No railings. Spalling of cap center pier. Diagonal bracing center pier removed. Top plank on north abutment & 3rd plant down on south abutment seperated approximately 1 1/2". Top wing planks seperating from piling @ both abutment. Southeast wing rebuilt in 2004. South channel bank erosion near structure & behing SE wing. Riprap placed along south abutment with some settlement & displaced riprap. 5/2016 - BEM'S missing north end.

Alert Code 1: Span 1 - Beam 2 & 3 separated 1 1/2", Beam 5 & 6 separated 1". Span 2 - Beam 1 & 2 separated 1 1/2", Beam 5 & 6 separated 1". Every other beam bolted together only over caps. Both abutment caps tilting away causing spall areas to the tops of both caps under the channel beam seats. South abutment moving in @ the bottom causing some cracking to the lower portion of beams 4 thru 6 @ the south abutment. Bump at south end.

Alert Code 2: 5/2016 - South abutment moving in @ the bottom causing some cracking to the lower portion of piles 2 thru 6 @ the south abutment.

Remarks: 12/08/2004: Slight sag in steel cap 1st pier from north. 11/14/2006 - Pile #4 South abutment broke in half, (Failed) Pile #1-Pier #3 split pile. 12/18/2008 - Pier #2 from north, sagged between piles.(photo) NBI Remarks: No railings. Slight sag to the east end of channel beam pier cap in pier #3. Ice damage to cross braces south pier. Pier #2 pier cap sagging between piles-see photos. Second pile from the west cracked and open approx. 1/2" at pier #3. Concrete filled tube installed around pile #4 south abutment embankment & riprap installed at south abutment slope protection. Riprap placed along the north channel bank downstream. 5/2016 - Pile #2 pier #2 split open at top .5". 5/2018 - County replace several deck planks and added 3" x 12" deck planks in the wheel path and replaced timber curb in 2017.

Alert Code 2: Pile #4 cracked near the bottom south abutment. West outside pier pile cracked and open to 1" at pier #3. 5/2016 - Metal collar installed on pile #1 pier #2 to prevent further cracking.

Remarks: 11/29/2006 - Because of flood damage, the County replaced timber piling #1 in Pier #2 with 12" H-pile. Steel channel beam doubled for 6' this area. See Photos. NBI Remarks: No railings. Drop structure 300' east of structure. Old piling in channel. Top of northeast wing pile rotting. Top plank of northwest wing missing. County repaired broken pile in pier #2. Replaced with 12" h-pile. Steel cap doubled this area-see photos. Riprap added to south abutment. 2010- Country replaced 2 backwall planks south abutment & placed riprap around culvert where it enters the channel near the SW wing. 6/9/14 - Structure posted 25 ton south end only. Pile #7 south abutment split @ the top & open 1".

Alert Code 1: 5/2016 - Vehicle damage to 3 areas of holes in deck. See photo. Bump at south end of deck with some damage to the steel deck.

Remarks: 11/21/2002 - See SI & A sheets, severe lean south abutment. 11/29/2006 - Lean unchanged this inspection south abutment. 12/23/2008 - South abutment lean unchanged. NBI Remarks: Spalling under beams south abutment. Vehicle damage to northeast corner curb. South bank erosion both sides of structure. No railings. Exposed footing south abutment. Utility cable attached to outside west curb. Vertical and diagonal cracking in the south abutment

Alert Code 1: 5/2016 - Scour along south abutment 20' x 40' x 1' deep.

Alert Code 2: 10/2010 - No change in lean measurements. South abutment bottom moving inward toward channel-leaning 4.25" in 4' west, 4" in 4' east, also top moved in 7" west side, 6" previous inspection - continued inward movement noted @ the west side of the south abutment in 2012. Minimal movement @ the SE corner south abutment. 5/8/2014 - No change in lean measurement & no change in inward movement of the south abutment observed in 2014 or 2016. 5/2018 - No change in lean or inward movement in 2018.

8401/3:Wings	each	4	100	4	0	0	0	0	0	0

Remarks: Date 12/16/2004: County has braced using 6" x 12" timbers between south abutment and center pier. Using 3 timbers to arrest movement, see photo. Tops of both abutments leaning in 2" to 6" on 4 ft. level. 11/29/2006 - Lean measurements unchanged. 12/29/2008 - Lean abutments unchanged. NBI Remarks: No railings. Spalling of center pier cap under beams over piling. Minor spalling on southwest corner of curb exposing reinforcing steel. Reinforcing steel exposed in some precast channel beams. 3 - 6" x 12" treated timber braces installed from south abutment to center pier to stop abutment from moving in. Vertical hairline cracks over piling pier cap. Lower portion of pier cap spalled with exposed reinforcing steel on east end. Top wing planks broken @ the NW & SE wings. Channel cleanout in east of structure in 2013. Channel runs thru south span - See photo. Inspection incomplete in November due to the completion of incomplete inspections from 2019 October County Structures. Inspection completed 12/5/2019. Telescoping Ladder used for the inward measurements. - 12/5/2019

Alert Code 1: Beaver Dam West of Structure restricting flow. See Photo. - 12/5/2019

Structure Number: 34-136-28.0

Alert Code 3: South abutment has moved in 20" west side, 16.5" east side, east end leans in 3" in 4' west end 5.5" in 4'. North abutment leans in 7" in 4' west and 4" in 4' east, no change in lean measurements in 2014. North abutment has moved in @ the top 26" west side, 11" east side measured from back of timber cap to back of channel beams. 6/2016 - More inward movement in 2016 & 2018 North abutment west side leans 6.5" in 4', 6.25 before. East side leans 3.75" in 4', 3.25" before. South abutment no change east side but west side leans in 5.5" in 4', 5" before in 2014. 12/2019 - No Change in Inward movement at the top of SE Corner of South Abutment. Previous Inspection 20". Measured in-between East Channel Beams from back of channel beam to back of timber cap. No Change in the 3" Lean near SE Corner. Inward movement of 20 1/2" at SW Corner of South Abutment. Previous measured movement of 20". Measured in-between West Channel Beams from back of channel beam to back of timber cap. No Change in the 5 1/2' Lean near SW Corner. No Change in the 16.5" inward movement at the top of the NE Corner of North Abutment. Measured in-between East Channel Beams from back of Channel Beam to back of Timber Cap. No Change in the 4" Lean near NE Corner. No Change in the 26" Inward Movement at NW Corner of North Abutment. Measurement taken in-between West Channel Beams at NW Corner. No Change in the 7" Lean near NW Corner. - 12/5/2019

Remarks: . NBI Remarks: No bridge rails. Bridge has precast concrete curbs. Honeycomb on bottom of east outside channel beam (minor). Bottom of one other beam has moderate spall. Top most plank in both abutments is tipped back. Settlement of both embankments has exposed outer corners of deck. Channel under structure approx. 4 to 5' lower than incoming channel. End markers missing. North abutment leaning toward channel approx.0.5'. South abutment starting to lean inward 1-2". Concrete curb spalled with rebar exposed in NE corner.

Alert Code 1: Top half of NW wing is fire charred. Soffit plank over piling and first vertical plank have severe fire damage.

Remarks: NBI Remarks: Back planks are pulling away from all wing piling. Piling have minor to moderate weather checks. Some debris scuffing on upstream members. Third and fourth piling from east, in south abutment, starting to rupture around a knot. East curb is spalled. No bridge rails. Bank erosion by wingwalls was repaired with riprap. Extensive bank erosion downstream from bridge. Wing wall piling show minor crushing where deadman anchors attach. A couple of back planks, in north abutment are beginning to rupture. Small spalls developing at various locations along bottom of channel beams. River channel moving laterally adjacent to NE wing. 1'x4' hole in NE corner of abutment and wingwall. 1'x3' hole in NW corner of abutment and wingwall No end markers. Dry rot in SE wing piling. Slight rotation in SW corner of south abutment. 30'moderate scour hole east of bridge. 9/26/2018 - North load limit sign missing.

Remarks: Moderate erosion behind NW wing. NBI Remarks: All end markers in place. Deck has several large areas of concrete scale; also transverse hairline cracks. Vertical hairline cracks in concrete curbs. Long, longitudinal hairline cracks were found on outside of north box beams in spans two and three. A 1 1/2 ft. square area of spalling was found in north abutment; piling is exposed. Concrete abutment also showing some deterioration below high water line. Short section of bottom of west abutment, exposed by settlement of embankment (toward SW end). SW and NE end markers are up. Settlement of embankment has left noticeable bumps in both bridge approaches. Moderate to severe scaling of deck surface has been covered with a chip seal. 1.5'x1.0' spall with exposed rebar in north curb near 3rd rail post in from west end. Bolts and or nuts missing that attach pedestrian rail to bridge. 12' of box beams chipped during riprap installation. Rebar exposed in concrete curb - 15'. 10/2016-10 Feet exposed concrete deck abraided. 6' N Side and 4' S side along entire length.

Alert Code 1: Short sections of rebar exposed, in deck surface, 30 ft. in from east end, rebar beginning to rust.

North Dakota Department of Transportation

Bridge Inventory - Structure Inventory And Appraisal Sheet

SEC 409

Structure Number: 39-106-29.0

- Alert Code 1:** Pack rust at all upper chord plates. Rivets missing at bottom of all end posts for rail attachments. Rails have damage from traffic impacts - SE & NW sections are missing. - 6/24/2019
- Alert Code 2:** Stringers are misaligned. All lower laterals are loose, especially the south. West diagonals & counters are bent. Both abutments and pile are bowing and out of plane. 2006: N abut pile is out of plumb 1-5/8"/2'; 11/14: NW 1-1/2", NE 2-1/2"; 1/18: NW 1-1/2", NE 1-1/2". - 6/24/2019
- Alert Code 3:** Steel abutment caps are bent, cracked, and distorted. The south cap is cracked at Stringers 3, 5, 7, 8, & 9. The north cap is cracked at Stringers 2, 4, 6, & 7. The crack above Stringer 7 extends through the top 1/2 of the cap. Entire paint system has failed and all steel members are rusty. - 6/24/2019

Remarks: Bridge Closed 1/11/2012. South abutment has washed out. 11/13 - structure is closed but traffic is still driving across, e-mailed Lowell - Richland County. SW & SE Wingwalls have broken away. SW has been replaced with timber. SE separation has been filled with timber planks. B&A end markers on all four end posts. Bridge closed 2012. Structure closed 10/3/2012. 9/24/13 - Bridge Closed. Nove 23, 2016 Structure remained closed since 1/11/2012. Nov 2, 2017 Structure remained closed since 1/11/2012. has metal beam welded across structure and type 1s one each end of structure. 11/18: Structure closed. 9/19: Structure closed. - 9/19/2019

Alert Code 1: Entire structure has moderate rust. Minor to moderate erosion under structure. Sway braces nos. 1 & 2 - west are bent. Loose bolts between sway braces and bottom chord - No.1 west, Nos.1 & 2 east. Moderate channel scour in sw quadrant. Minor shoulder erosion behind nw wingwall. Timber planking in se wingwall has failed. - 9/19/2019

Alert Code 2: Concrete abutments have heavy deterioration - south is the worst with severe cracking, spalling, & missing sections. Floor beam No. 3 is bowed. - 9/19/2019

Fracture Critical: 9/19: Structure closed. - 9/19/2019

4000/2:Settlement	each	1	0	0	0	0	100	1	0	0
Notes:West wing wall has settlement - 6/20/2019										

Remarks: Deck has tread planks. SE abutment backwall has been filled with rock. Posted for 3 tons. B&A end markers on all corners. West and South West channels have major erosion. Crack arrested weld over bent cap 1 at south abutment. 2017: Timber rails have been replaced. North abutment has washed out and south abutment is starting to washout, unable to get under structure for safety reasons 6/20/19 - 6/20/2019 Large hole 9' deep by 20' wide on north side of structure. Bridge closed 6-20-19 - 6/20/2019 movd from Critical Finding cta.

Alert Code 1: Deck has varying degrees of decay. Both caps are bowed. Sway brace #3 east is bent. - 6/20/2019

Alert Code 2: Floor beams 1 and 2 are bowed. Most of the east floor beam hangers are loose. Moderate abutment scour, exposing bottom of both backwalls. Impact damage to north end post of east truss. - 6/20/2019

Alert Code 3: West end of north abutment has settled. Trusses are no longer parallel: 20.4' out to out at top of south end and 20.7' out to out at top of north end, and north end of west truss is tipping down. Called L. Bladow-Richland County about the settlement on 11/7/2018. - 6/20/2019

Remarks: B&A end markers at NW & SW corners. Posted for 4 tons. Vertical curve - north. Horizontal curve - south.
1/10/2018: Emailed L. Bladow-Richland County pictures of the corroded abutment pile. He stated that he will monitor this structure.

Alert Code 1: Deck planks have moderate wear. Heavy embankment erosion - SW quadrant. Both metal rails have traffic impact damage. Minor flood debris hung up in superstructure.

Alert Code 2: The web of the north pile in the SE wingwall is rusted through. Bent or damaged members: U1-L1, lower chord L1-L2, U7-L7, U7-L8, U8-L8 Lt; U1-L1, L2-U3, L3-U3, U4-L5, U7-L7, U8-L8, lower chord L9-L10, both end posts Rt. Pack rust forming at lower gusset plate connections.

Alert Code 3: South abutment piling have heavy rust at ground level with section loss present, and the webs of Pile #'s 9 & 10 are rusted through. Both abutment caps are distorted. The south cap is cracked at bolt holes below Beam #'s 3 & 5, and the north cap is cracked at bolt holes below Beam #'s 3 & 4.

Remarks: 2/2017: Reduced random girder cracking from Code 3 to Code 2 after talking with Bridge Division since the cracking is not getting any worse. Guardrail on approach corners only, which is low & rub rail has fallen off on NW corner. B&A end markers at all corners. Rip rap added at SW corner. Rust stains visible along the west edge of the deck.

Alert Code 1: Random deck cracking, some soffit efflorescence is visible. South abutment is undermined, piling is exposed. Heavy debris hung up under structure. Minor spalling in south abutment beneath Beam #'s 1&2. SW bank is eroding.

Alert Code 2: All girders have hairline longitudinal cracks 3" to 5" from the bottom, entire length of beam and on both sides. All beam ends at both abuts have multiple random cracking, with NE and SW corners most evident-approx 4' on each end.

North Dakota Department of Transportation
Bridge Inventory - Structure Inventory And Appraisal Sheet

SEC 409

Structure Number: 39-127-20.0

Remarks: B&A end markers on ne and se corners. Vert. curve south. Horiz. curve north. Signed for "narrow bridge", "curve" & "25 mph" north, Red and white end markers on sw corner. Old concrete columns and steel piling under structure. W-beam attached to ne corner. Timber rail has had some areas repaired. Posted per LG 4/24/19 nmh 6-27-19 Road Closed signs located North and South of structure, called Richland county about the signs and they reported the bridge to be open. - 6/27/2019

Alert Code 1: Railing has collision damage. Scour has exposed piling in south abutment. Sections of timber curb are broken. Erosion at all bridge corners. Major wear on tread planks. Moderate channel erosion at SW ditch. Stringer 9 in north approach slab is tilted. - 6/27/2019

Alert Code 2: Scour has exposed bottom of both backwalls. Roadway is narrowing due to washouts at all 4 corners of the structure due to scour & erosion-see photos. Bent/damaged truss members: South endpost, upper chord U4-U5, U9-L9 Lt; U1-L1, U2-L2, U3-L3, U6-L6,L6-U7, U7-L7, North endpost Rt. - 6/27/2019

Alert Code 3: South abutment is pushed in and a section is missing. Abutment cap is only supported at east and west ends. - 6/27/2019

Fracture Critical: Inspection was completed at arms length with a hammer, extendable mirror and binoculars. See filenet documents on 11-15-18 for report and pictures. - 6/27/2019

Notes:Both North wing wall are bowed at the top - 6/21/2019										

Remarks: B&A end markers on NW, NE, & SW corners. Slight vertical curves both directions. Caissons & abutments are out of plumb, all measurements in 2': ??/?: NW caisson, bottom is in 1" in 2'. SE caisson, bottom is in 1/2" in 2', SW caisson, bottom is in 1/2" in 2', S abut. bottom is in 3/4" . 10/07: se 1/4" in 2', sw 1/2" in 2', s backwall 1 1/4" in 2' , n caissons 3/4" in 2'. 12/08: n abut 3/4", s abut 1", caissons: nw 1" n/s, 3/4" e/w; ne 3/4" n/s, 1/2" e/w; sw 3/4" n/s, 1/4", NW Cas. W 1/4"-S 7/8", NE Cas. W 1/2"-S 1/2", SW Cas. S 3/8"-W 1/2" SE Cas. W 3/8"-S 1/4", S. abut on center pile 3/4". N Abut Pile 5: 1-1/2" below brace. S. Abut center pile: 1/2". caissons: nw 1" n/s, 1/4" e/w; ne N/A; sw 1/2" n/s & e/w; se 1/4" n/s, 1" e/w. 1/16: NW 1 1/8", NE 3/4", SE 7/8", SW 7/8". B&A @ NE is damaged. SE wingwall has been replaced with a Gabion. 6-21-19 water still flowing high, unable to inspect the underside of bridge. - 6/21/2019 Bridge closed due to roadway north of bridge has washed out and there are washouts behind both abutments - 6/21/2019 Comment moved from Critical Finding cta. 10-10-19

Structure Number: 39-128-27.1

Alert Code 1: Varying degrees of rust and deterioration throughout structure. railing has collision damage. 12/08: all meas in 2'-n abut 3/4", s abut 1", caissons: nw 1" n/s, 3/4" e/w; ne 3/4" n/s, 1/2" e/w; sw 3/4" n/s, 1/4". Caissons 10/18 SW-1" in 2' S and 1/4" in 2' W. SE-3/4" in 2' S, 1/4" in 2' W. debris under and to the East of the structure. Rust and section loss of all piling at waterline. Driving planks are worn. Bottom of both backwall exposed. - 6/21/2019

Alert Code 2: Bent and/or damaged members: SW end post, panel point #1 Lt, sway brace #'s 1 and 2 Rt, U1-L1, U3-L2, U3-L3, U3-L4 Rt, Stringer #3 in Span 2, east stringer in Span 1. Some rivets replaced with bolts, several of which are loose: 1 loose in upper connection of Sway Brace 2 Lt, 1 loose in upper chord of U3 Lt, 1 loose in each upper chord splice plate over U3 Rt & Lt, & 6 loose in U3 Rt gusset connection. West truss has damaged at U0 L0, East truss has vertical # 1 R, diagonal up 3 L4 has bent. - 6/21/2019

Alert Code 3: North abutment pile are bowed & twisted, South abutment pile bowed. Both abutment cap is bent and twisted. N abutment cap cracked at stringer 2&3. North span stringer 1 had no contact with cap. Multiple stringers missing bolts at caps. South abutment pile 4, 5 missing bolts to cap. - 6/21/2019

Fracture Critical: Inspection was completed with a hammer, extendable mirror and binoculars. See filenet documents on 12/14/2018 and 2/13/2018 for report and pictures. - 6/21/2019

Notes:section loss at NW truss joint - 6/20/2019											
8401/2:Wings	each	4	25	1	75	3	0	0	0	0	

Remarks: 6"x12" yellow end markers at all 4 corners. Signed for 3 tons and No Trucks. Lots of welding & reinforcing done to west end posts & top chord. 4"x4" box beam vert members have been installed at U1-L1 & U3-L3 Rt & Lt - welded to stringers 1 & 11 with 4"x4" box beam welded at U1 & U3 Rt & Lt & extending under & welded to stringers 1-4 & 8-11 & a partial floorbeam. Steel straps have been welded to stringers 2-4 & 8-10 & pass under floorbeam. Repairs appear to only add to dead load. No washers at west eye bars on top west end posts. Fracture critical inspection done on 11/20/2018. - 6/20/2019

Alert Code 1: Railings have collision damage. Light to moderate rust - entire structure. Varying degrees of timber deterioration throughout substructure. Pins in west truss member not moving. Gravel on both abutment caps due to separation of deck planks. Minor scour under structure. Pack rust between east upper chord connection plates. - 6/20/2019

Alert Code 2: U2-L2 Lt and lower chord eye bars (Lt & Rt) are bent. U1-L2 Lt. exterior eye bar forge weld has failed and has been reinf with 1/2" cable and clamps. Both abutment caps have moderate rotation, and the north cap is distorted. - 6/20/2019

Alert Code 3: Forge weld at lower exterior eye chord bar at the SE end post is cracked through, and has been welded. - 6/20/2019

Remarks: No end markers. Minor collision damage to upper railing. Lower railing has been removed. Old piling in channel. Nov 15 2016 , South abutment pile # 2/3 & 4 had cracked/shakeed with brooming apeareed all other timber element has moderate cracked, ALL steel elements have failed on steel protective coating , west truss, vert has traffic impacted. BRIDGE CLOSED 11-2-2017, 6/20/19 - 6/20/2019

Alert Code 1: Moderate rust throughout. Varying degrees of timber deterioration. Both caps cracked and slightly rotated. - 6/20/2019

Alert Code 2: Both bottom chords bent. Lower lateral rods have been removed and replaced with 2"x 2" angle iron bolted to stringers -1 per panel. U2-L2 is bent. Upper chord has been cut at U1 Lt and U3 Rt. U1 has been replaced with 188" plates bolted to interior webs and top flange.U3 has been repaired with 188" plates bolted to exterior webs and top flange. East end of floor beam has been spliced between Stringer 39;s 9 and 10 using a 24" lap weld on the south side and a 16" lap weld on the north side. Laps are also bolted with 189 bolts. Rivets broken at rail post ends. Pack rust at plates. Many rivets replaced with bolts. - 6/20/2019

Alert Code 3: South abutment is bowed in and Pile Nos. 4 of 5 are snapped. South cap is cracked. - 6/20/2019

1090/1:Exposed Rebar	ft	59	0	0	0	0	0	0	100	59
Notes:Concrete bridge rail has failed and no longer effective - 6/17/2019										
8401/1:Wings	each	4	75	3	25	1	0	0	0	0
1080/1:Delamination/Spall/Patched Area	each	1	0	0	100	1	0	0	0	0
Notes:We wingwall has deteriorated concrete with exposed rebar - 6/17/2019										

Remarks: NBI Remarks: No signing, railing or guardrail. Bottom 1/3 of abutments have been encased in concrete. Channel has moderate vegetation growth. Moderate erosion around wingwalls. No scour & no channel profile taken due to concrete floor in channel. SE wing has large piece of concrete missing with rebar exposed. County has closed the bridge per Local Govt. 3/2019. nmh As of 6/17/2019 structure is not closed. 8/19 Structure closed, photos in Filenet. cta

Alert Code 1: Deck & curbs have moderate spalling. Original portions of concrete abutments have moderate spalling. Outside girders are bowing out. - 6/17/2019

January 03, 2020

North Dakota Department of Transportation

Bridge Inventory - Structure Inventory And Appraisal Sheet

SEC 409

Structure Number: 41-117-22.0

Alert Code 2: The deck has concrete deterioration along both fascia beams, the deteriorated concrete is and has lost bond with reinforcing steel. - 6/17/2019

Alert Code 3: The concrete between the south fascia girder has failed and there is 6 foot by 2 foot hole in the concrete deck. Aaron Kelch has called the county rep and informed him of the current condition and sargent county was sending personel out to close the bridge. The structure was on Sargent's list for removal. - 6/17/2019

Critical FindingAs of 6/17/2019 structure is not closed. LG notified county 7/03/19

Remarks: NBI Remarks: Pile rusted and corroded one pile north abutment driven at and angle. 11/2010 Scour hole under bridge. 11/2010 Curb decayed with one section gone. 7/17/2013 - NEW CURB NEEDS TO BE INSTALLED WEST & EAST SIDE . SCOUR HOLE NORHT ABUTMENT. 11/19/14 Stream side of NW wing has large scour/erosion area. 9/08/2016 - One driving plank on bridge has hole worn almost completely through in 5 foot area. Not all girders are bolted to the pier caps. 9-19-18 south barriers are slightly bent. south posted sign has been hit and needs to be set up. 8-28-19 - Replaced damaged running planks, added more running planks, and new curbs both sides. cta 9.16.19 - Some new deck runner planks were installed and widened out the driving area, new curbing/rail was also installed. The deck still has a horizontal plank that has an area of decay that is almost worn threw the plank. Column corrosion/rusting was not able to be checked for progression due to high water, used archive photo's for updated quantities. - 9/16/2019

Alert Code 2: 11/2010 - NORTH PILING HAS MEASURABLE SECTION LOSS & HEAVY RUSTING. - 9/16/2019

6000/2:Scour	each	2	0	0	0	0	50	1	50	1
Notes:Northeast abutment and wing has a sink hole and scouring that is progressively getting worse. See updated photos. - 11/8/2019										
8401/2:Wings	each	4	75	3	0	0	0	0	25	1
1130/2:Cracking (RC and Other)	each	4	100	4	0	0	0	0	0	0
6000/2:Scour	each	1	0	0	0	0	0	0	100	1
Notes:NE wingwall is suspended in the air from scouring/sinkhole behind the wing and working into the slope, this area also has a drainage pipe. See updated photos. - 11/8/2019										

Remarks: NBI Remarks: Deck has minor diagonal cracks on surface and efflorescent staining underneath. Barrier has minor cracks & staining. Efflorescent staining on South abutment walls at construction joints. Construction joint cracking. 11/17/2011 - South approach slab has settled about 2". Barriers have settled along with it. 9/10/2015 - All wing walls have minor cracking Channel profile completed. 9/6/17 - Pier 2 has a 1'x1' spall area around beam/diaphragm mid span, & one to the West has a delamination/spall area that looks to be starting as well. - 6/7/2019 11.8.19 - City called us out to look at the south abutment as they were concerned with the scouring underneath, it remains the same as previous inspections. NE abutment and wing however has gotten worse since the last inspection in June. Sink hole on the back side of the NE abutment causing water to wash in and worsen the scouring on the slope, drainage pipe in this area too that is in the scour area, see new photos. Substructure changed to a 5 from an 8 due to progressive scouring on the abutments. - 11/8/2019

Alert Code 1: 6.7.19 erosion along ne corner pier wall w scour hole 20'x20' and still moving - 6/7/2019 - 11/8/2019

January 03, 2020

North Dakota Department of Transportation

Bridge Inventory - Structure Inventory And Appraisal Sheet

SEC 409

Structure Number: DKS12

Alert Code 2: 6.7.19 - exposed rebar on pier wall SW end. - 6/7/2019 11.8.19 - Erosion along south abutment east side has exposed piling. The scour erosion has run down to the pier creating a small sand bar. (moved from alert 1 - 11.8.19) - 11/8/2019

Alert Code 3: 6.7.19 erosion along ne corner pier wall w scour hole 20'x20' and still moving - 6/7/2019 11.8.19 - Erosion and scouring on the slop and behind the NE wingwall, sinkhole behind wing and scouring that has gotten worse around wing causing it to be suspended in the air, also a drainage pipe in this area. - 11/8/2019

1080/2:Delamination/Spall/Patched Area	each	1	0	0	0	0	0	0	100	1
Notes:Portion of NW Wing completely spalled out. See photo. - 12/11/2019										
1130/2:Cracking (RC and Other)	each	1	0	0	100	1	0	0	0	0
Notes:Vertical Cracking at SE Wing due to inward movement. Wing beginning to separate from Abutment. So Photo. - 12/11/2019										

Remarks: 2/15/2005 - East abutment moving in at top, measurement taken at north end 15", south end 9". see photo.
 2/12/2007 - Measurement taken at north end of East Abutment increased to 18" , south end 11". 9/12/2007 - No change in movement. 02/13/2009 - East abutment movement increased. Measurements at top (paint marked). North end now 20", South end 12". North fascia beam moving away from deck. Concrete backwall diaphragm broke out at NE corner. NBI Remarks: Spalling under beams east abutment. Concrete deteriorating both abutments. Chunk broke out top northwest wing with spalling & exposed rebar. 11/2016 - County added sheet piling and riprap at the NE wing. See Photo. Channel runs along east abutment. 10/2018 - Posted 03 tons passenger cars only both ends. 12/2019 - North two girders bolted with plates on webs to tie together and prevent additional twisting of North Facia Girder. See Photo. Inspection incomplete in November 2019 due to the completion of the Incomplete October 2019 County Inventory. Inspection completed 12/11/2019. - 12/11/2019

Structure Number: 46-118-04.0

Alert Code 1: Scaling lower portion west abutment exposing reinforcing steel southwest corner and up to 1 1/2" of section loss near the center of the abutment. Lower portion approximately 3" of bow to the east abutment. - 12/11/2019

Alert Code 3: 01/2011 -East abutment moved in 22" north side & 15" south side, a change from 20" & 12" previously. North outside girder twisting & moving away @ the NE corner due to abutment movement. Inward movement east abutment changed from 15" in 2005 to 20" in 2011 north side & 8" to 15" south side. 7/26/12 - East abutment moved in 24" north side, 22" previously. East abutment moved in 15" south side-no change from previous inspection. Continued inward movement noted in 2012 @ the NE corner. 10/1/14 - East abutment moved in 30" north side, 27.5" previously, south side moved in 20", 19 1/2" previously. East abutment leans away 3" in 4' measured @ center 2.75" before.. Span length now measures 29.9 north side @ top. 11/2015 -Span length north side 29.75' was 29.9'. Void area behind NE corner of east abut. 10/25/2016 - East abutment leans away 3.25 in 4'. Was 3" in 4'. East abutment moved in 32" north side, 30" before. Continuous movement of the east abutment. 11/2017 - EAST ABUTMENT LEANS IN 3.5" IN 4' A CHANGE FROM 3.25". MINOR ADDITIONAL MOVEMENT IN 2017. No change in east abutment lean measurements. 12/2019 - No change in the 3 1/2" of Lean to East Abutment. East Abutment Inward Movement at 22" SE Corner. Measured on top and underneath to from front of endwall to front of Abutment Face. No Change. East Abutment Inward Movement observed at 34" at NE Corner. Measured at Top and underneath from front of Endwall to front of Abutment Face. A change from 32". Additional inward movement observed. See Photos. - 12/11/2019

1130/3:Cracking (RC and Other)	each	2	0	0	100	2	0	0	0	0
Notes:Cracking at NE and SW wingwalls. - 12/18/2019										

Remarks: Short vertical curve-south. Accumulation of dirt & gravel on caps. Concrete back wall at deck is spalling out leaving a gap at both ends. Posted for 13 ton. No evidence of slope protection. PVC markers on SE corner. Moderate scaling at abutments. Deck planks are misaligned and pushed to the west, mainly in the center. Incomplete Inspection 9/16/19 unable to inspect underside due to high water. 11/25/2019: Unable to verify condition of girders due to thin ice. 12/18/19:Completed inspection. - 12/18/2019

Alert Code 1: Minor erosion at both abuts. Moderate abut wear throughout, & wide cracks at NE and SW corners. SW & NE wingwall are cracked. Girders are weathered: shakes in south 1/2 of Girders 4, 7, 10, and entire length of east fascia girder. Through-split of Girder 5 2" from the bottom in the south 15'. - 12/18/2019

Alert Code 2: Probing at abutment corners revealed a 3-4' scour area at NW corner. - 12/18/2019

Remarks: Posted for 8 tons per axle 18 tons gross. Drain pipes on west side of structure are bent. End markers on all four corners. Two inch conduit attached to west curb. Vertical curve to the north. Vertical and horizontal curve to the south. Bridge has w-beam guardrail. PVC markers on approach corners.

Alert Code 1: Minor deck cracking with minor to moderate soffit efflorescence is visible. 10 out of 12 angle iron diaphragms are bent.

Alert Code 2: NW rocker is tilted against north abutment. Beams are pushed against abut. Abut has large horizontal cracks. The south deck is pushing out past the abut face approx. 1". Both abuts have moderate spalling at waterline with holes completely thru the concrete. Erosion behind SE wingwall with undermining on the south bridge end. North backwall is cracked just above the top of the abut. Deck has longitudinal, flexural cracks with effl & rust staining.
