## TECHNICAL CERTIFICATION PROGRAM - RECIPROCITY

### REQUESTS

Reciprocity requests will be considered on a *limited* case-by-case basis for individuals that have been selected for a NDDOT construction project. Reciprocity is not guaranteed.

### ACCEPTED CERTIFICATION

Asphalt Pavement Inspection and Asphalt Mix Controller/Mix Design requests accepted from certification originating in Minnesota or South Dakota and are current.

Aggregate Field/Gradations, Aggregate Field Lab and Asphalt Mix Testing *May require a performance exam.*)

ACI Concrete Field Testing is equivalent to Concrete Field Testing and ACI Concrete Strength is equivalent to Concrete Strength

### NOT ACCEPTED CERTIFICATIONS

Soil Field Tester

### APPLICANT RESPONSIBILITY

Verify your certifications are relevant and equivalent before submitting a request. [Review this summary.](#)

Reviewing the associated ND tests and procedures as published in the current [Field Sampling and Testing Manual](#). Note: aggregate tests be completed during aggregate production AND during asphalt mix production.

Provide supporting documentation that describes the class content/tests [with your application](#). If you do not provide supporting information your request will not be processed.

### SUCCESSFUL COMPLETION

Reciprocal certification will be listed on the TCP registry. The expiration date will be posted based on the end of calendar year. *(Example: if your Minnesota certification is valid through 5/15/24 it will appear as 2023)*
