PUBLIC INPUT MEETING

GRAND FORKS — NEW SOUTHSIDE INTERCHANGE

INTERSTATE 29

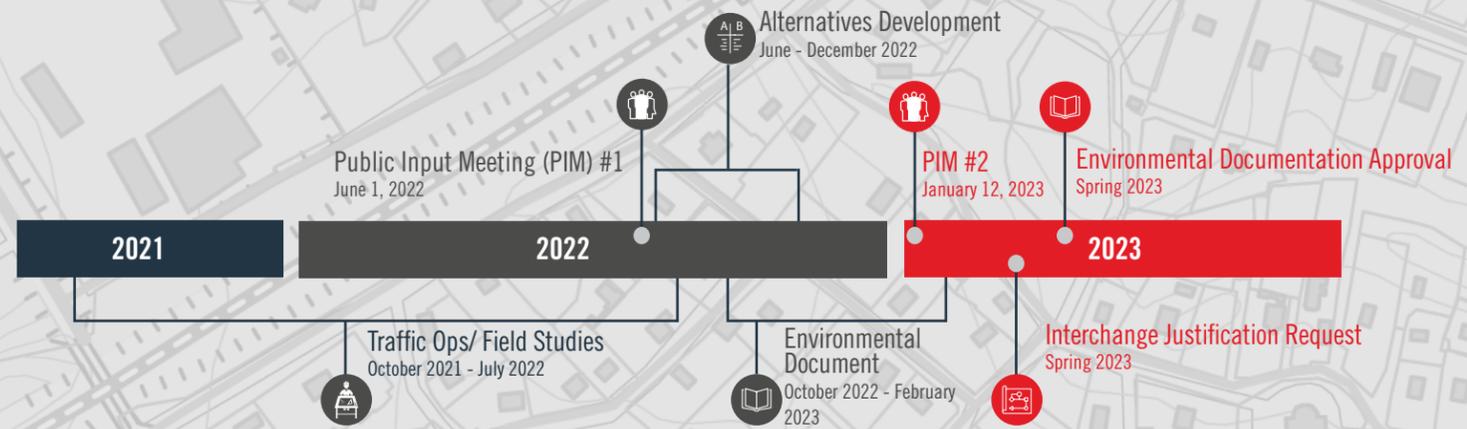

WHAT IS THE PROPOSED PROJECT?

The current Grand Forks – New Southside Interchange project is intending to study potential alternatives, including location and configuration, for a potential new interchange in south Grand Forks between 32nd Avenue and 62nd Avenue. This phase of development is anticipated to conclude with the selection of a preferred alternative and issuance of environmental and interchange approval from the Federal Highway Administration.

WHY IS THIS PROJECT NEEDED?

The project is being driven by current and future growth in south Grand Forks. Over the past 20 years, the majority of Grand Forks' population growth has occurred south of 32nd Avenue. Looking at future land use models, this trend is anticipated to continue with 56 percent of future employment and 46 percent of future household growth forecasted to occur in south Grand Forks. This growth is straining the operational capacity of the 32nd Avenue interchange.

WHAT IS THE TENTATIVE PROJECT SCHEDULE?

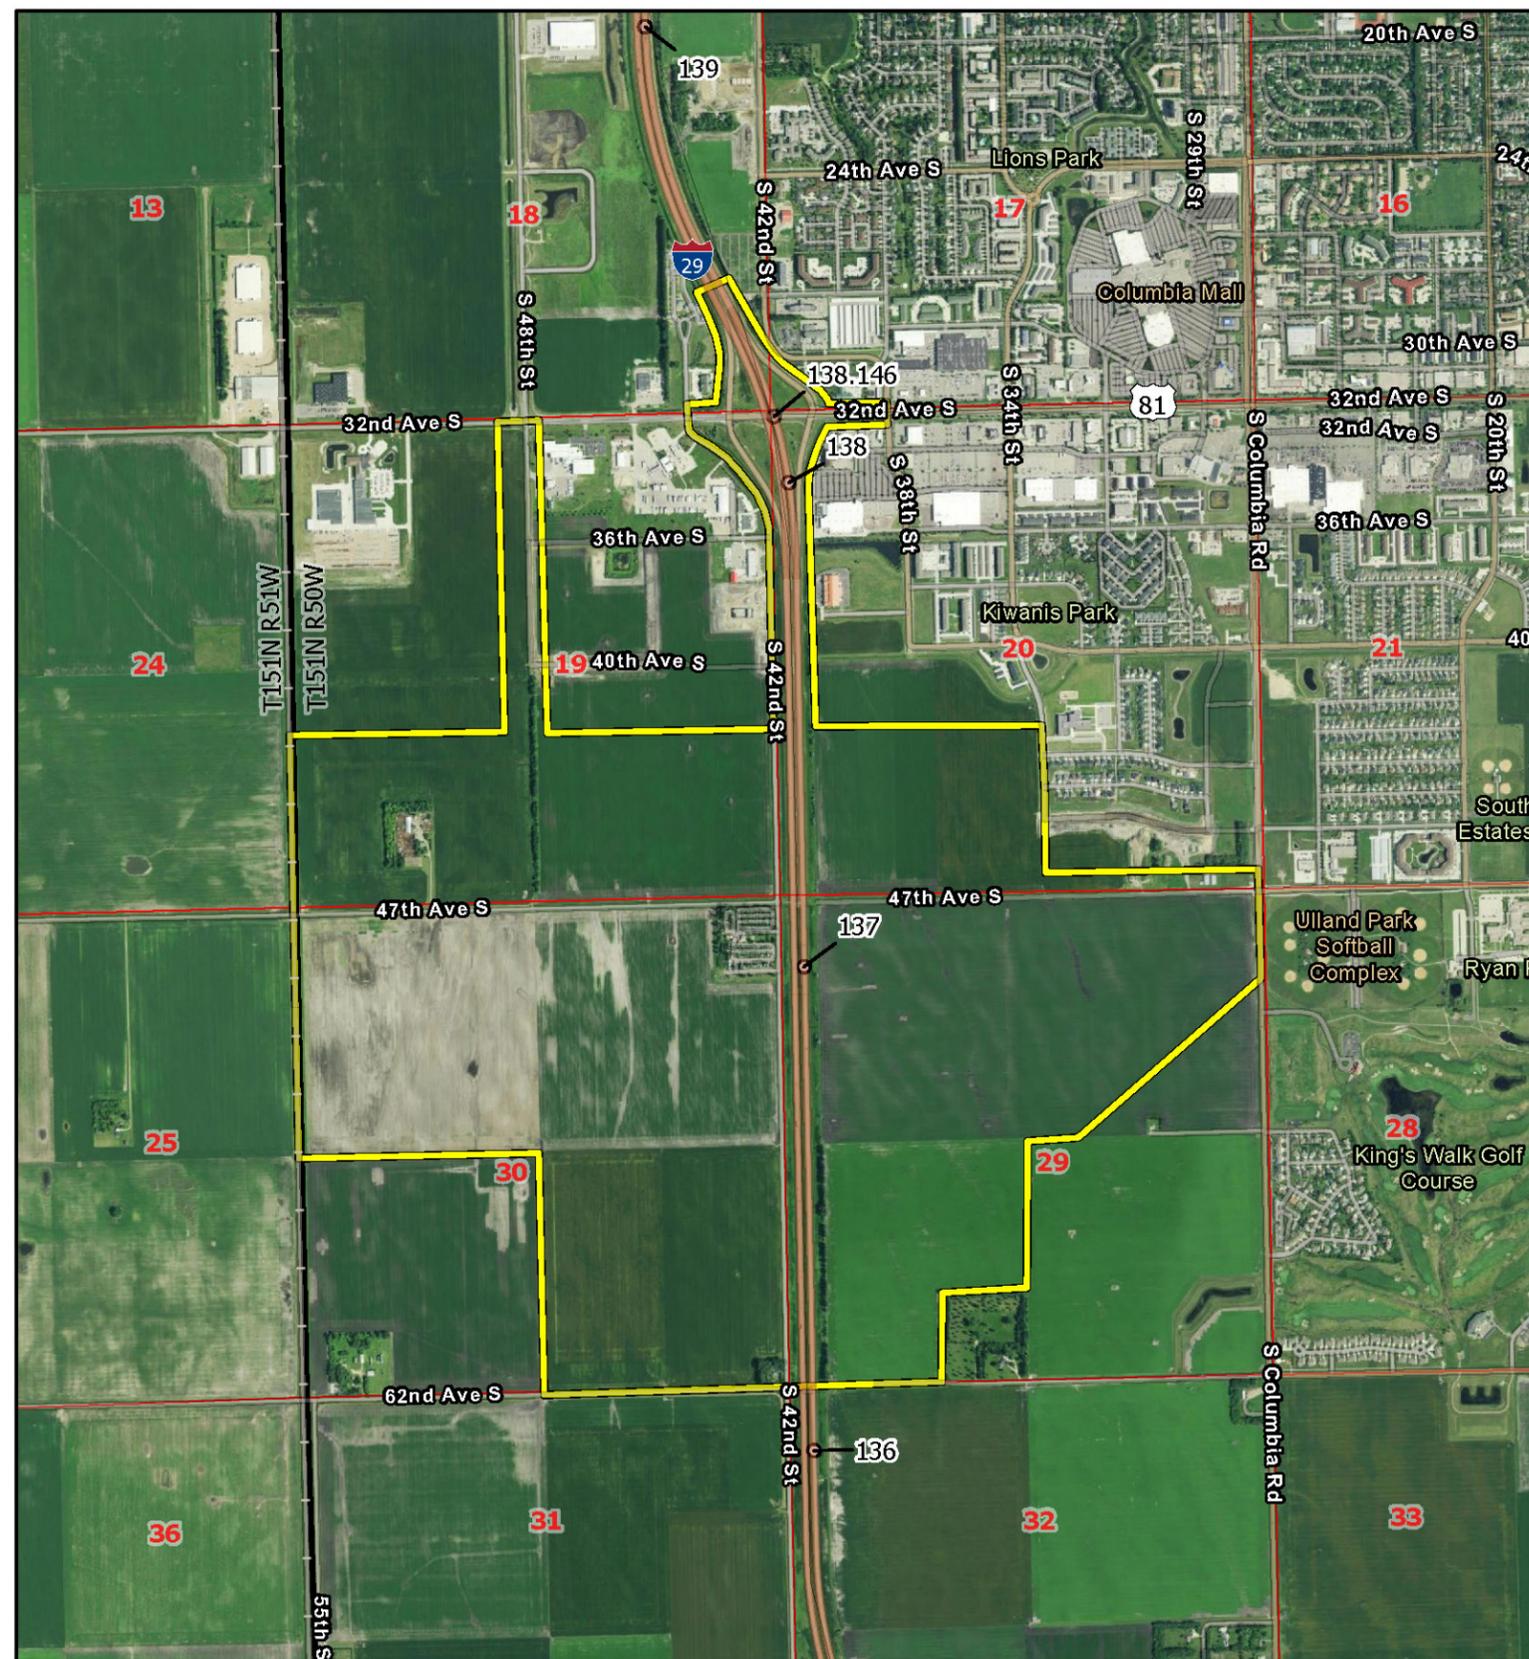

WE WANT TO HEAR FROM YOU
