No Travel Advisory extended to south central and north central ND

The North Dakota Department of Transportation and the North Dakota Highway Patrol have extended the **NO TRAVEL ADVISORY** in south central and north central North Dakota including Bismarck, Minot and surrounding areas due to extreme ice, compacted snow and blowing and drifting snow causing long stretches of icy roads and near zero visibility at times creating hazardous driving conditions. Conditions are such that motorists in this area **should not travel**. Motorists should take a **NO TRAVEL ADVISORY** seriously as those motorists who choose to travel at their own risk may become stranded and emergency responders may not be able to reach them safely.

Motorists should also be aware that travel conditions can change quickly and blowing and drifting snow with heavy accumulation throughout the night will continue to create hazardous driving conditions and roads could become blocked, especially at bridges or sheltered areas.

Motorists should be advised that snow plow operators have been working since early morning hours and throughout the day. NDDOT snow plows in the urban areas of Minot and Bismarck/Mandan will continue to operate throughout the evening and plows in rural areas will resume operation early tomorrow morning.

A **No Travel Advisory** remains in effect for Mandan, Center, Glen Ullin, Carson, Selfridge and surrounding areas.

A **Travel Alert** remains in effect for western and central North Dakota including Williston, Dickinson and surrounding areas.

All travelers are encouraged to monitor road conditions as weather conditions occur and use caution while traveling. For road information, call 511 from any type of phone or go to the website: www.dot.nd.gov.

Please be advised that road condition information on 511 and the travel map is updated daily from 5 a.m. until 9 p.m. CDT. The road report is based upon the information available to the NDDOT at the time of preparation and is provided solely as a public service. Conditions may vary from those reported
