Water on US Highway 83 north of Coleharbor and ND Hwy 256 south of Antler

The North Dakota Department of Transportation (NDDOT) is reporting water over the roadway on US Highway 83 approximately one mile north of Coleharbor on both northbound and southbound lanes. Traffic is allowed at reduced speeds. Water is also reported over the roadway on ND Highway 256 approximately six miles south of Antler. Traffic is allowed with reduced speeds.

Fluctuating water levels make it difficult to predict when and where water will go over a roadway or recede from the roadway. The NDDOT encourages motorists to check road conditions before traveling due to rapidly changing conditions. For updated road information, call 511 from any type of phone or go to the Travel Information Map on our website at www.dot.nd.gov.

The road report is based upon the information available to the NDDOT at the time of preparation and is provided solely as a public service. Conditions may vary from those reported.
