## **Building removal to impact southbound traffic on US 281 and Main Street in Ellendale this weekend**

The City of Ellendale will be removing a building adjacent to US 281 and Main Street in Ellendale on Saturday, November 22 and Sunday, November 23. Southbound US 281 traffic will be detoured onto the local street network during this time. Northbound traffic will proceed as usual. During this process a marked detour will be in place for traffic control.

### **During this project:**

- Southbound over dimensional loads are restricted to legal width, legal lengths, and legal weights.
- Southbound trucks with multiple trailers could have difficulty negotiating the local streets and should consider taking an alternate route.
