**ONE ROAD CLOSURE FOUR-LANE DIVIDED HIGHWAY**

**FOR ACCESS TO TWO-WAY TWO-LANE ROADWAY**

---

**Notes:**

1. Use standard spacing for flexible delineators equal to the speed limit "S" established for the two lane two way roadway.

2. Roadway under construction is expected to be closed to all traffic. If the contractor chooses to use the roadway under construction as a haul road, provide the following: Place yield sign and flagger for construction traffic at high volume crossings. Do not stop public traffic on the crossroads for construction traffic. Engineer determines which cross roads are low or high volume. To gain access to the closed roadway, position barricades in a location that will not interfere with the sight distance of haul vehicles. Place barricades in their original position at the end of the work day.

3. Place type of short term pavement markings shown on the plans.

4. Place type of short term pavement markings shown on the plans.

---

**KEY:**

- **W** Work Area
- **P** Flagger
- **T** Type III Barricade
- **S** Sign
- **M** Tubular Markers
- **S** Sequencing Arrow Panel
