MINIMUM VERTICAL CLEARANCE:
Install signs with a minimum 5 foot vertical clearance from bottom of sign to top edge of the driving lane or auxiliary lane in rural locations. Provide a minimum 7 foot vertical clearance where parking or pedestrian movements occur. Install signs with a minimum 7 foot vertical clearance on freeways, expressways, and multilane conventional roadways.

A vertical clearance of 5 feet is acceptable where signs are placed a minimum of 20 feet from the edge of the traveled way.

Place signs a maximum of 6' above the vertical clearance specified above.

NOTES:
- Place signs a maximum of 6" above the vertical clearance specified above.
- Minimum of 30 feet from the edge of the traveled way.
- A vertical clearance of 5 feet is acceptable where signs are placed a minimum of 20 feet from the edge of the traveled way.
- Install signs with a minimum 7 foot vertical clearance on freeways, expressways, and multilane conventional roadways.
- Install signs with a minimum 5 foot vertical clearance from bottom of sign to top edge of the driving lane or auxiliary lane in rural locations.
