Number of loops and number of turns as shown in the plans

Construction Joint Detail
Use Construction Joint Detail when a crack in the roadway is encountered.

Saw Slot Details
Drill detector loop corners 2" deep then saw pavement slots to form loops. Dimensions and location shown in plans.

Notes:
1. Saw each loop in roadway.
2. The number of turns, size of loop, and size of conductor shown on the plans.
3. Plane leads from the loop to the pull box in saw slots and conduits to minimize interaction.

[A] 1" minimum on concrete surface
2" minimum on asphalt surface

Loop Detector Detail (Passage or Calling Loops)
Number of loops and number of turns as shown in the plans.
