

DIRECTIONS TO FILL OUT ADDITIONAL INFORMATION FOR WETLAND JURISDICTIONAL REQUESTS ON NDDOT PROJECTS

A. Project Location and Background Information

Name of nearest Waterbody

- Use county road maps from county courthouse or USGS topographic maps

Name of nearest Traditional Navigable Water

- Refer to Table 1

Name of watershed or Hydrologic Unit Code (HUC)

- Refer to the following link: <http://www.nationalatlas.gov/mld/hucs00m.html>. In the list of links on the right side, click on "Hydrologic Units (Watersheds)" under "Map Maker Sample." The first time the site is used, go to the "Tools" tab in the upper left part of the page, hover over "Pop-up Blocker" and select "Pop-up Blocker Settings." Type in the website address, click "Add," then "Close." Use the "Zoom to State" box in the top center of the website, select "Identify" above the map, and click on the project location. Use the Cataloging Unit Name and Number.

Approximate acreage being considered in this cumulative analysis

- Wetland acreage to include wetland boundaries that extend outside of the Right of Way (total wetland size)

C. General Information

- General Area Conditions
- HUC Watershed Size refer to the following link: http://water.usgs.gov/GIS/huc_name.html. To find the correct HUC, press Ctrl + F, type in the HUC from Section A, and hit "Enter." The HUC number should be highlighted on the page; use the area (sq. mi.) provided.
- Average Annual Rainfall/Snowfall refer to the following link: http://www.hprcc.unl.edu/stations/index.php?state=ND&station_network=1&action=search&searchby=Search+By+State
