OVERVIEW

This report contains summaries of data obtained from studies conducted in 2020 by the North Dakota Department of Transportation (NDDOT) Planning and Asset Management Division. This Division is responsible for the collection and analysis of traffic data in North Dakota. Traffic data collection has been conducted in North Dakota since 1936. The NDDOT compiled and presented this information as an annual report starting in 1963. Due to the continuing demand for this information, the annual report has continued to ensure that this information is readily available.

Included maps, graphs, and tabulations illustrate annual average daily traffic (AADT). They also illustrate percentage of travel by hour, month, and season and illustrate estimates of annual vehicle miles traveled (VMT) by highway system. The data was obtained from the following sources:

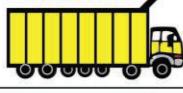

1. Automatic traffic recorders (ATRs) continuously record hourly volumes of traffic throughout the year. A list of 81 ATR stations with their locations are presented on pages 9, 10 and 11. The counter locations are shown on the map on page 12.
2. Short term counts were obtained using portable equipment. We count 1/3 of the state every year with short term counts on various highways roads and streets along with the interstates statewide. There are approximately 2900 short-term counts for region per year. See map 6 to see what was counted this year and what will be counted next year.
3. Weigh-In-Motion (WIM) sensors continuously record the class and weight of trucks. A list of 17 WIM stations can be found on page 9 while their locations can be found on page 13.
4. NDDOT classifies and counts 2 types of trucks, Single Units (SU), and Combination Units (CU)
 - A) Single unit trucks are those trucks that do not articulate at or have a 5th wheel anchor plate with which to pivot a trailer, for example a Federal Express (FedEx), or United Parcel Service (UPS) type of truck (Classes 5-7).
 - B) Combination unit trucks are those trucks that can articulate one or more trailers behind the tractor, for example a standard class 9, 5 axle semi, or a triple trailer combination (Classes 8-13).

Only basic information of general interest is included with this report. More detailed information is available and can be obtained on our website or by contacting the Traffic Data Section of the Planning and Asset Management Division of the NDDOT, 608 East Boulevard Avenue, Bismarck, ND 58505-0700, (701) 328-3458.

Maps with all of our traffic counts can be accessed on the NDDOT website by entering the following URL address:

FUEL TAXED INCLUDES GALLONS OF GAS FOR OTHER THAN MOTOR VEHICLES

Annual Vehicle Miles figures are for all roads in the state including trails and unimproved roads

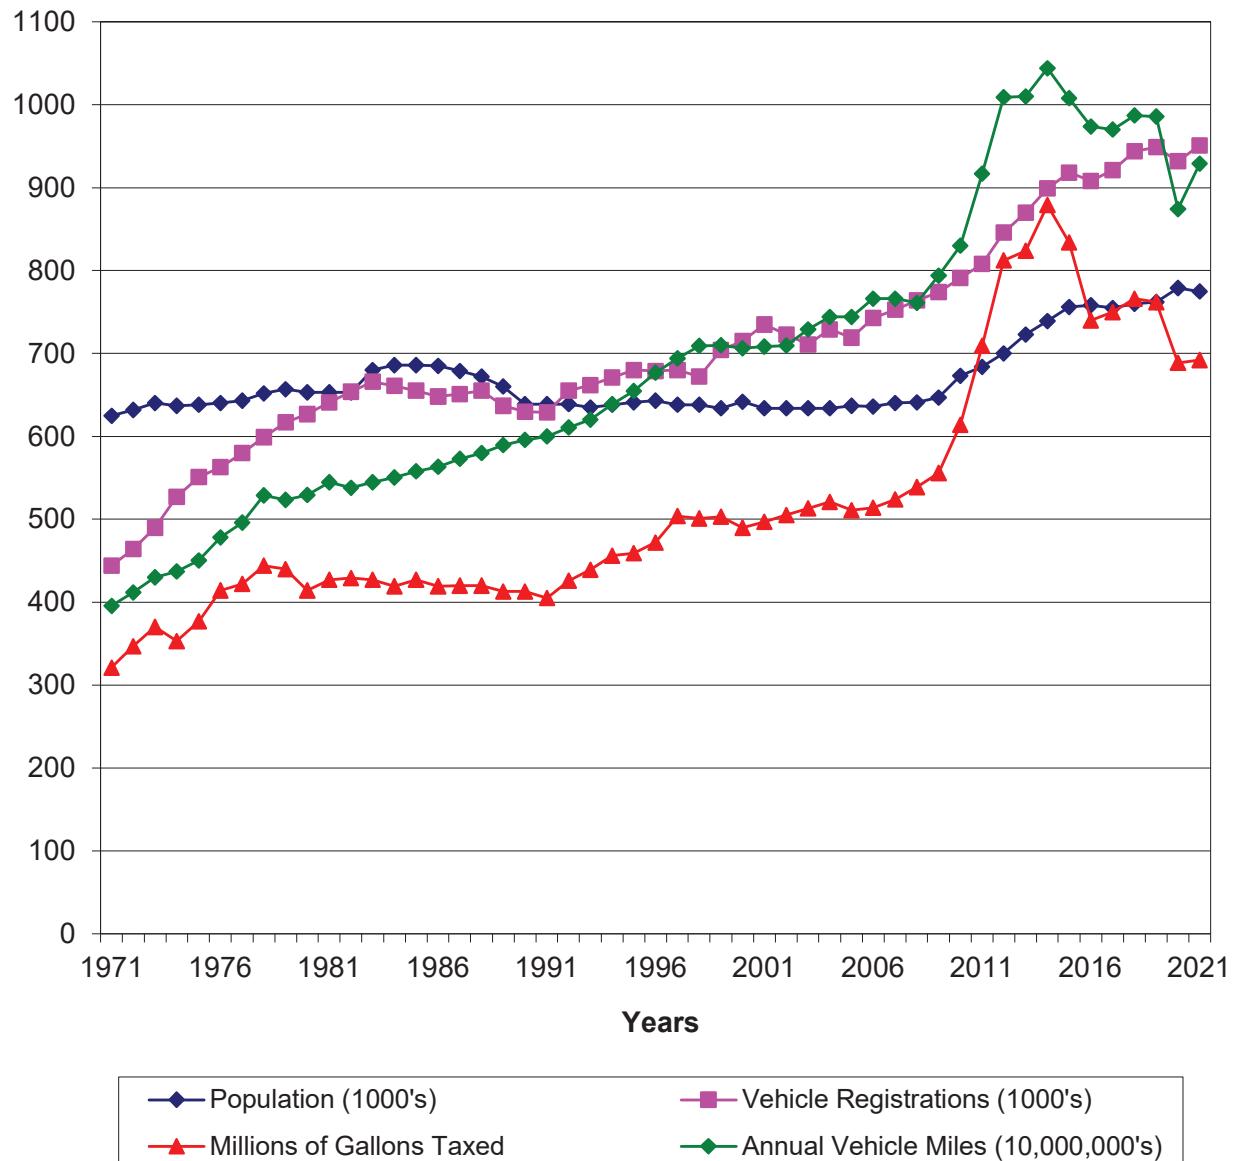

The number of vehicle registrations in a given year will exceed the total number of vehicles in the state

because a vehicle may be registered more than once if there was a change in ownership.

*2016 Gallons of Gas and Fuel Taxed (Millions) were revised by the ND Tax Department

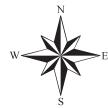

Traffic and Related Trends

For the Years 1971 - 2021

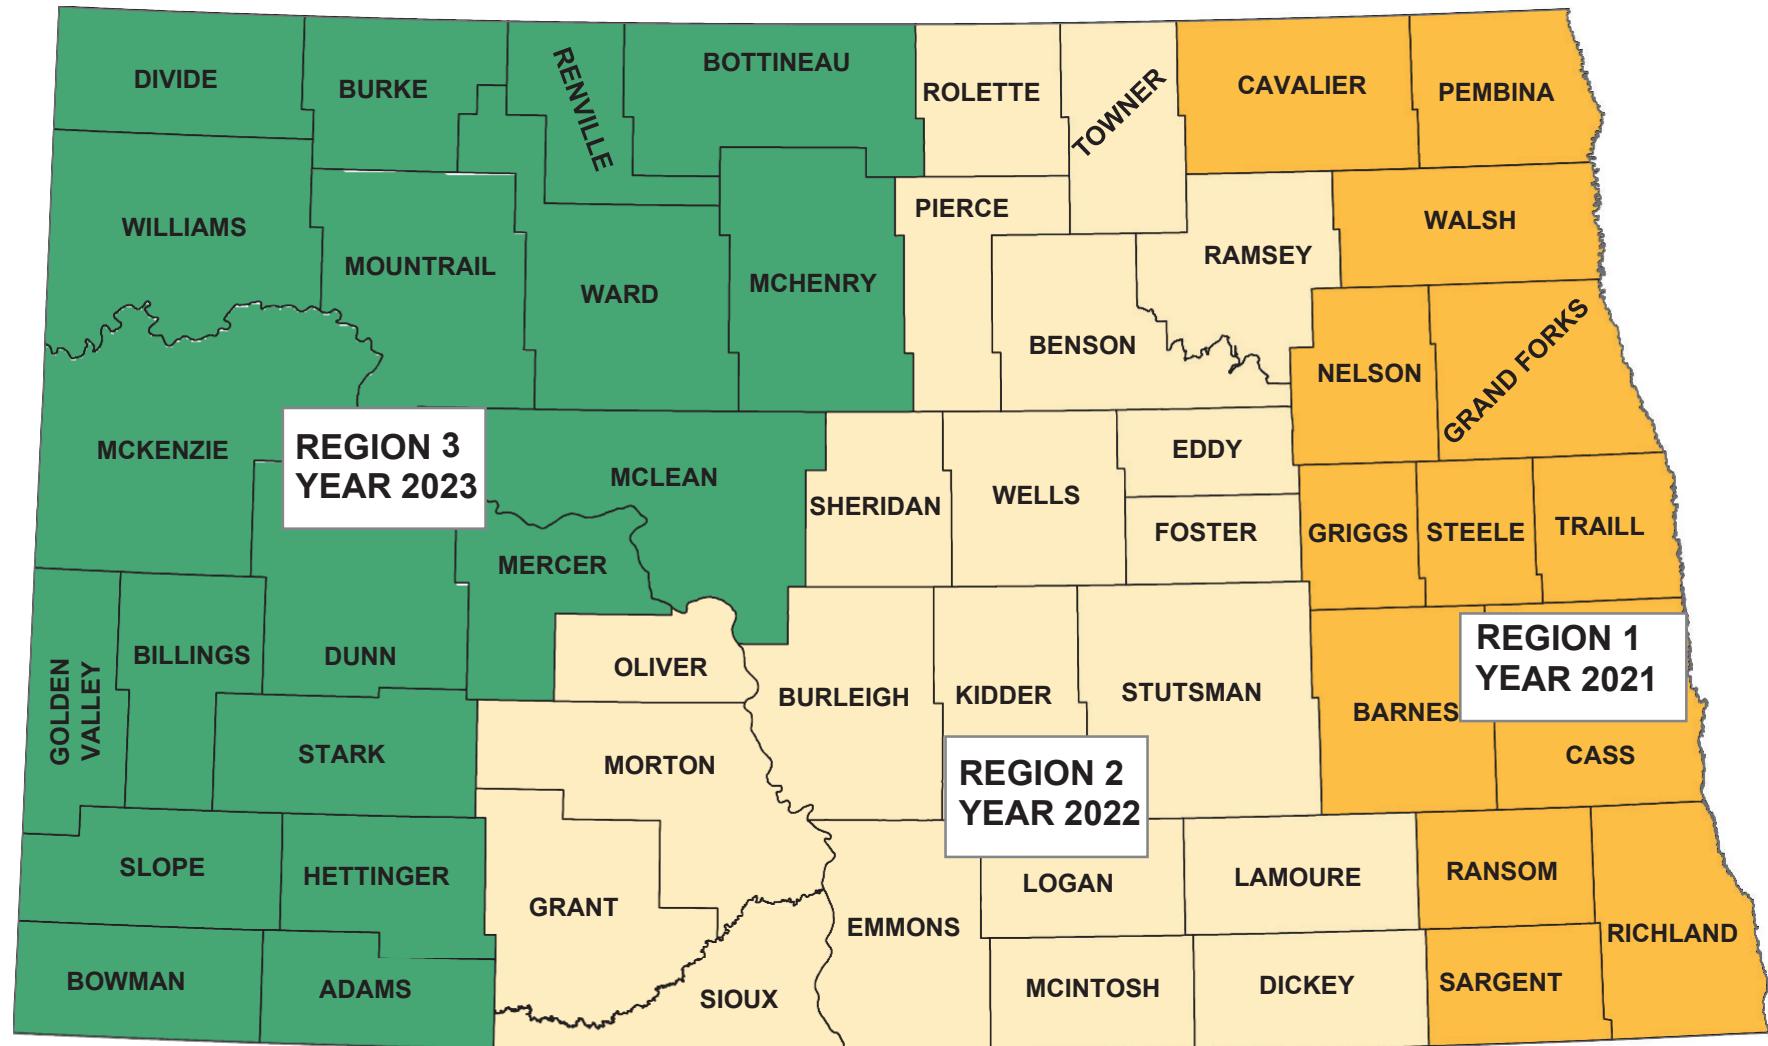

North Dakota Department of Transportation

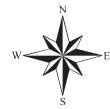

Current Traffic Counting Cycle

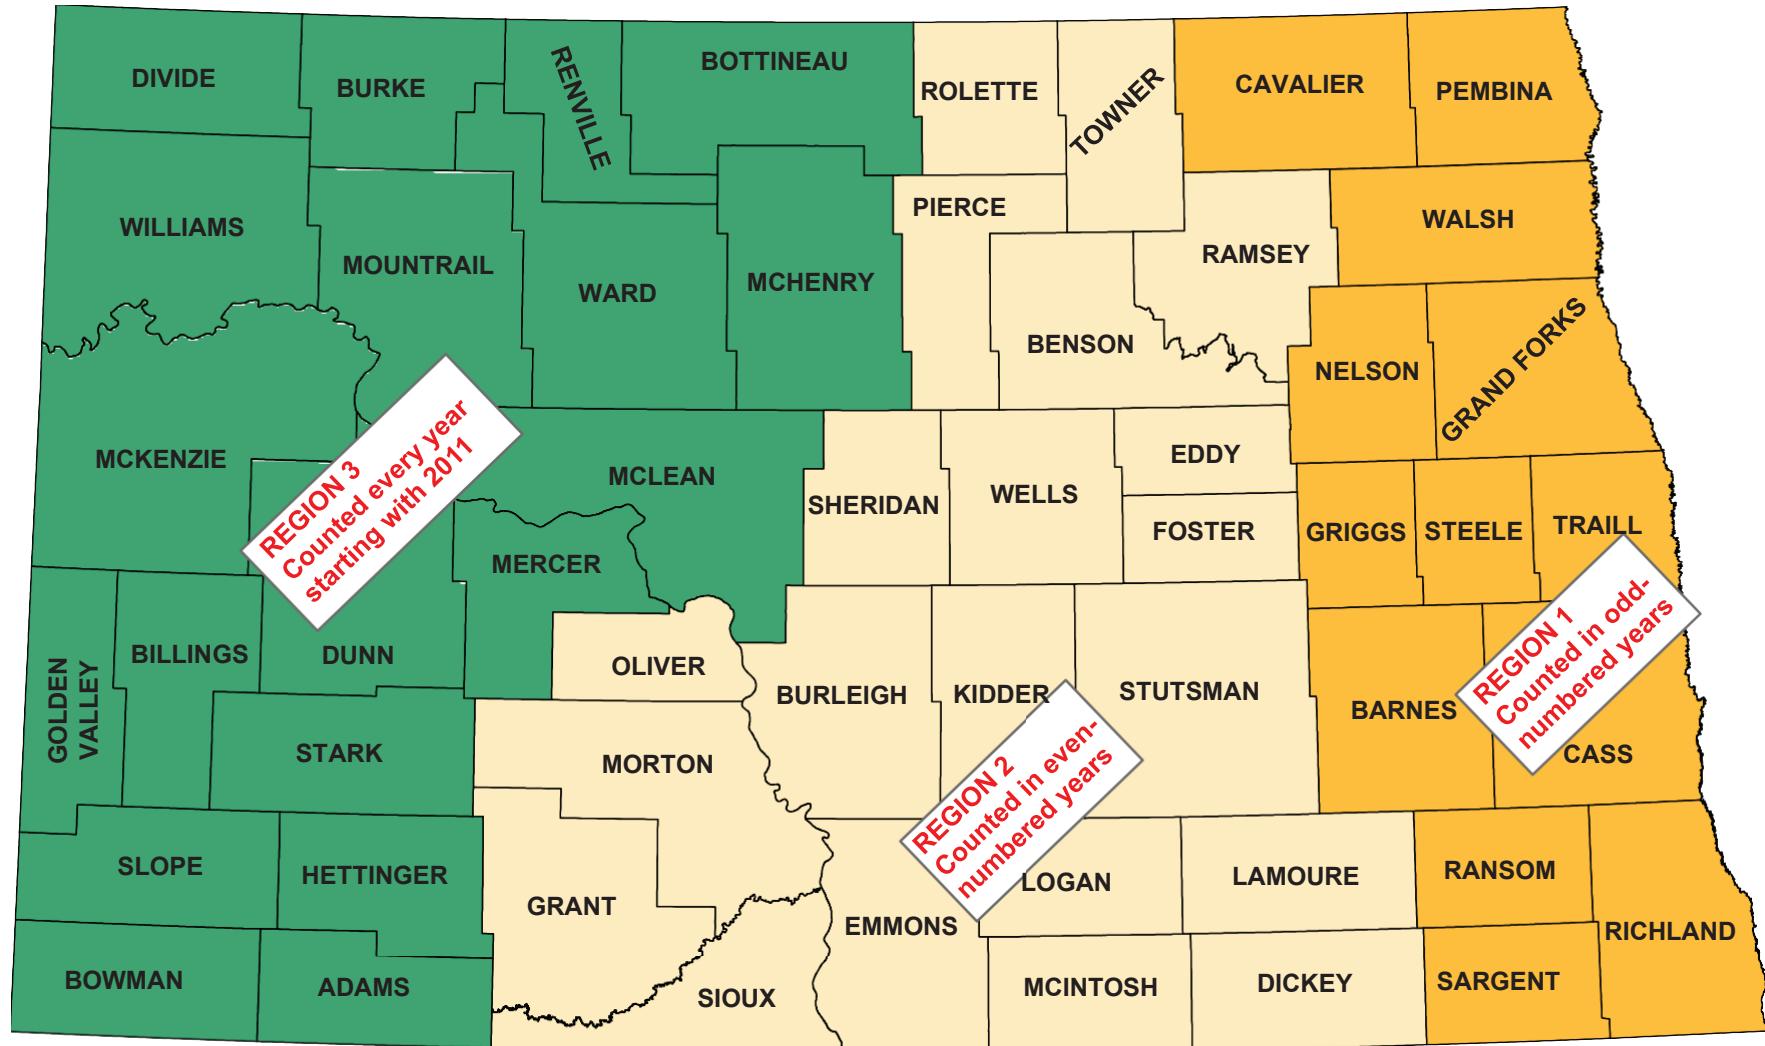

Region 3 and one other region per year were counted from 2012 to 2016.
One region is counted per year starting in 2017. Region 3 is no longer counted every year.

North Dakota Department of Transportation Prior Traffic Counting Cycle 2012-2016

Region 3 is counted every year whereas the other two regions are only counted every two years.
We started counting two regions per year in 2012 and stopped in 2016.
